"People who want to age well are forced to become full-time project managers of their own health."

In an environment of infinite wellness options, trusted curation becomes more valuable than product proliferation. Longevity is no longer inaccessible. It is overwhelming. Consumers are not struggling to find options. They are struggling to decide what is worth trusting, combining, and repeating.

The problem is not lack of supply.

It is lack of intelligent, taste-driven curation developed in consultation with medical professionals.

[01] THE INSIGHT

What is broken about how people engage with longevity?

01 Discovery
Hears about longevity from a podcast, book, or friend. Excitement peaks.

02 Research
Finds 300,000+ supplement SKUs, contradictory protocols, influencer advice. Overwhelm begins.

03 Scattered Purchases
Buys from 4 to 6 different brands. Downloads 2 to 3 apps. No connection between them.

04 Self-Curation
Attempts to build their own stack. Spends EUR 150 to 400/mo across fragmented services.

05 Decision Fatigue
Cannot evaluate quality, dosage, interactions, or timing. Guilt replaces excitement.

06 Abandonment
Gives up within 60 days. Returns to old habits. 96% digital health app churn rate.

66
DAYS

66 days to form a health habit. 96% of users churn before they get there. The window between initial motivation and lasting behavior change is where nearly every wellness product fails.

Lally et al. (2010), European Journal of Social Psychology; Baumel et al. (2019), Journal of Medical Internet Research; RevenueCat State of Subscription Apps (2025).

[01] THE INSIGHT

Why **now**?

Three forces have converged to create a once-in-a-decade entry point.

Force 1: Demand exploded. Infrastructure did not.

- Peter Attia's **Outlive**: #1 NYT bestseller, sold 3M+ copies globally
- Andrew Huberman: **10M+ followers** across platforms
- Bryan Johnson: made anti-aging cultural, mainstream media coverage worldwide
- Euromonitor 2025: healthspan ranked **#1 global consumer trend**
- **84% of consumers** now rank wellness as a top priority (GWI 2024)

"Consumer awareness has outpaced every product category built to serve it."

Force 2: Germany's prevention gap is an open market.

- **EUR 474B** spent on healthcare annually (12.3% of GDP)
- Only **3.1%** allocated to prevention
- 7.8 hospital beds per 1,000 population (OECD average: 4.2)
- **62% of Germans** say the system focuses too much on treatment

"The gap is not a policy debate. It is an open market."

Force 3: Technology is ready. Nobody has integrated it.

- **CGM sensors:** real-time metabolic tracking, consumer-grade
- **AI:** personalized protocol generation at scale
- **Wearables:** sleep, HRV, stress monitoring (validated accuracy)
- **Red light therapy:** clinically validated, growing adoption
- **Functional nutrition:** proven category, fragmented delivery

"All the pieces exist. No one has assembled them."

Euromonitor International (2025); OECD Health at a Glance (2023); Destatis (2023); Global Wellness Institute (2024).

[01] THE INSIGHT

Who is **left out**?

SERVED (NICHE)

Clinical Biohackers

- Build their own complex stacks
- Technical, intimidating
- Requires extensive self-education

UNSERVED

The Missing Consumer

- Fewer options, better selected
- Integrated rituals, not scattered products
- Authority without medical intimidation
- Taste without pseudoscience
- Has purchasing power, aesthetic sensitivity, high LTV

"No ecosystem built for them."

SERVED (MASS)

Mass-Market Consumers

- Buy trend-driven products
- No structure or integration
- Short-lived experimentation

Is this a vitamin or a painkiller?

This is a painkiller.

EUR 8.9-21.1K

SPENT PER USER/YEAR ON FRAGMENTED ALTERNATIVES

96%

DIGITAL HEALTH APP CHURN RATE BEFORE 66-DAY HABIT THRESHOLD

RevenueCat 2025

62%

OF GERMANS SAY HEALTHCARE SYSTEM FAILS AT PREVENTION

Destatis 2023

alche is a painkiller for a population hemorrhaging time, money, and motivation on wellness fragmentation. The pain is measurable. The market is quantifiable. The timing window is **18 to 24 months** before US players localize to DACH.

Sources: Euromonitor International (2025); OECD Health at a Glance (2023); Destatis (2023); RevenueCat (2025); Lally et al. (2010); Baumel et al. (2019); Global Wellness Institute (2024).

[02] WHO WE SERVE

Longevity for people who actually live.

Not the 1% who cold-plunge at 5 AM. The millions who care about aging well but have been given fragmented tools that deliver data without direction.

PRIMARY PERSONA

Mira

34 / Berlin / Product Designer / EUR 72,000

Runs three times a week. Takes magnesium and vitamin D but is not confident about dosing. Wore an Oura ring for five months , checked her sleep score every morning until it started **giving her anxiety about not sleeping well enough**. The ring is on her nightstand.

Tried Levels for two months. Learned bananas spike her glucose. Thought "...now what?" and cancelled. Has a supplement shelf with six half-empty bottles. She does not want to optimize. She wants to **live fully and age well without it becoming her second job**.

PER MONTH, INTEGRATED
ONE PLATFORM

We are not creating new health spending. We are consolidating fragmented budgets into a single integrated relationship , at a lower price point with better outcomes.

WHY BERLIN

The ecosystem is forming here.

Berlin has the highest concentration of health-conscious expats in DACH, a 15-20% English-speaking population matching alche's content language, and lower operational costs that extend runway. The Biohackers Berlin Meetup alone has 2,213 members.

800K	15-20%	2,213
RESIDENTS AGED 25-45	ENGLISH-SPEAKING POPULATION	BIOHACKERS BERLIN MEETUP MEMBERS

MARKET VALIDATION

27% of Germans are willing to pay out-of-pocket for health apps (SpringerMedizin). Berlin tech worker median salary: **EUR 75,000 gross** (GfK). The purchasing power and willingness to pay for curated health experiences are already proven in this market.

SpringerMedizin 2024 / GfK Purchasing Power Study 2024 / Biohackers Berlin Meetup / Berlin Partner / DSSV 2024

[03] THE MARKET

The European longevity market is forming now.

No integrated player exists. That changes within 12-18 months.

THE GERMAN HEALTH PARADOX

Germany spends nearly **EUR 495 billion** on healthcare annually (12.3% of GDP) , the highest in the EU. Only **4.8%** goes to prevention. With 7.7 hospital beds per 1,000 people (OECD average: 4.2), the system was architecturally built to treat illness, not prevent it. Consumers are filling the gap themselves.

COUNTRY	HEALTH SPEND (% GDP)	LIFE EXPECTANCY	GAP
Germany	12.3%	81.1 yrs	#1 spend, below 5 cheaper systems
Switzerland	11.3%	83.4 yrs	+2.3 yrs, spends less
France	12.1%	82.2 yrs	+1.1 yrs, spends less
Japan	11.5%	84.5 yrs	+3.4 yrs, spends less
OECD avg	9.3%	80.3 yrs	

OECD Health at a Glance 2025 / Destatis 2023 / GWI 2024 Global Wellness Economy Monitor

MARKET SIZING

TAM / SAM / SOM

TAM $6.3T Global wellness economy (GWI 2024). Context marker , not a revenue claim.

SAM €3.2-4.1B

Germany. Supplements (€2.67B), functional beverages (€2.8-3.2B), digital health apps (€263M), premium wellness (€300-500M).

SOM 145 subscribers to break even

From 108K Mitte residents aged 30-44. Conservative: 300 members Y1. Base case: 600. alche consolidates existing spend.

~108K	250-280K	~400K
MITTE 30-44 YR OLDS	HIGH-INCOME HOUSEHOLDS (>€4,500 NET/MO)	PKV HOLDERS IN BERLIN (PREVENTION COVERAGE)

EUROPEAN ADVANTAGE

Not behind , structurally different.

Insurance covers prevention

PKV (8.73M holders) reimburses €200-500/yr in wellness. US consumers pay 100% out-of-pocket.

Centuries of Kur culture

European wellness built on apothecary traditions. alche speaks to that lineage, not Silicon Valley imports.

GDPR as trust differentiator

Only 8% of EU consumers share health data. A GDPR-native platform is a feature, not a compliance cost.

Lower pricing works here

€19-99/mo matches European norms. US players at $199/mo will feel overpriced.

GWI 2024 / Statista 2024 / Euromonitor 2024 / PKV-Verband 2024 / BEUC 2024 / DSSV 2024 / Berlin Partner

[04] COMPETITIVE LANDSCAPE

We mapped the terrain.

30+ companies analyzed. The integrated European longevity platform does not exist yet.

COMPANY	POSITION	SCALE	GAP
Oura	Wearable ring. 5.5M sold, 2M subscribers. Acquired Veri (CGM).	$11B	No lifestyle layer
Hims	Telehealth + DTC. Distribution-first, not community-led.	$2.3B rev	No integration
ZOE	Nutrition AI. Science + warmth. UK-based, nutrition-only.	~$100M rev	Single vertical
AG1	Content-first supplements. $600M revenue, profitable.	$600M rev	No data layer

Oura tells you your sleep score. It does not help you fix it. Each competitor does a piece. Nobody connects data to action to product to community , especially in Europe.

> *"We studied $1.4B in failures so we could build differently."*

WHAT $1.4B TAUGHT US

Seven companies with better funding than us made specific, identifiable, avoidable mistakes. Three survivor patterns emerged:

01 , ASSET-LIGHT

ZOE, AG1, and Levels survived by curating and connecting , not owning the value chain. Forward built $1M hardware pods and collapsed after burning $657M.

02 , CONTENT-LED

AG1 built a $600M business on content and community, not clinical infrastructure. ZOE grew on Tim Spector's authority. Science is necessary but not sufficient , distribution wins.

03 , COMMUNITY-FIRST

When GLP-1 drugs arrived, companies without community had no reason for users to stay. Social fabric is the only retention moat that survives technology disruption.

THE WINDOW

12-18 months before well-funded incumbents integrate European longevity protocols.

Oura has not localized beyond hardware retail. Hims EU expansion is nascent. Levels and Function Health are US-only. Neko Health (Spotify founder) focuses on scanning, not integrated wellness. The full-stack European longevity platform is wide open.

[05] THE SOLUTION

The Product

A physical-digital wellness company operating a flagship space, a proprietary mobile application, an outcome-based product brand, and a membership programme.

alche is a physical-digital wellness company. It operates a flagship space in Berlin Mitte offering LED red light therapy and functional smoothies, a proprietary mobile application with 10 integrated modules, an outcome-based product brand, and a membership programme. Every interaction generates structured data that feeds a central information system.

PHYSICAL (BERLIN)

- Flagship location in Berlin Mitte
- 6 functional smoothies (Alché Potions N°1-6, EUR 7-11)
- 5 functional boosts (+EUR 2 each)
- LED red light therapy (Glow 630-660nm, Recovery 810-850nm)
- Curated product shelf (own blends + third-party)
- Wellness events and expert sessions

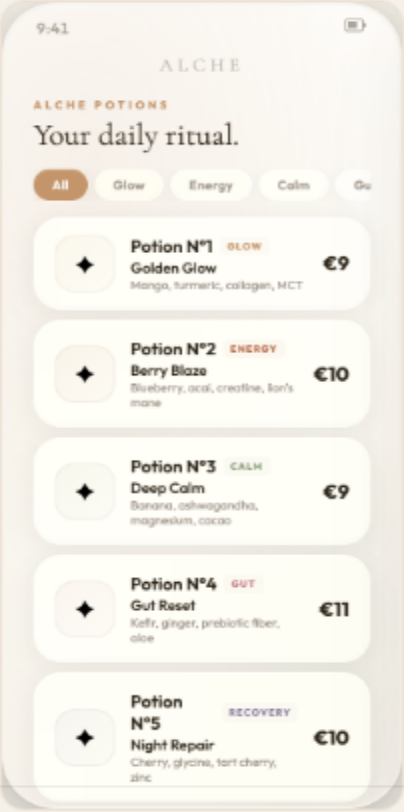
→ Builds trust, generates behavioral data

DIGITAL (GLOBAL)

- Proprietary mobile application (10 modules)
- Membership tiers (Core EUR 19/mo, Pro EUR 49/mo, Premium EUR 99/mo)
- Goal-based wellness journeys with adaptive protocols
- Glow Scan (selfie → score 0-100)
- Online shop with smart replenishment
- Digital Twin (AI-optimized user profile)

→ Recurring revenue, borderless scalability

CORE APP SCREENS



THE CUSTOMER EXPERIENCE

How It Works

01 **Choose Your Goal**
User selects a wellness outcome in the app (Glow, Energy, Calm, Sleep, Recovery). The system generates a personalized protocol based on the selected goal.

02 **Book a Session**
Real-time LED chair availability in 20-minute slots. Smoothie and boost pre-ordered during booking. Two session types: Glow (630-660nm) and Recovery (810-850nm).

03 **Visit the Space**
QR check-in on arrival. Smoothie ready, LED mask prepared. Zero wait time. Guided 20-minute session with post-session potion.

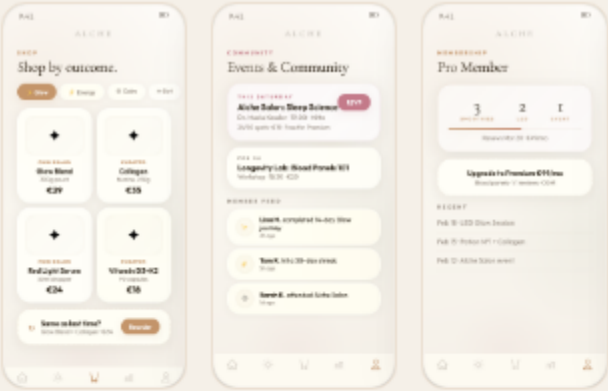
04 **Post-Session Feedback**
Log energy, mood, and skin condition. The system captures structured behavioral data that improves future recommendations.

05 **Browse and Buy**
Product shelf organized by outcome. Own-brand blends available as take-home pouches. The boost in the smoothie becomes the product on the shelf.

06 **Smart Follow-Up**
App reminds, recommends products, schedules next visit. The loop repeats with better data each time, improving personalization.

CORE SCREENS

EXTENDED SCREENS



THE DATA ENGINE

Every smoothie order, every boost selection, every LED session, every product purchase, every event attendance generates structured data that feeds the information system. The physical space is not just a revenue source. It is a data-generating environment that enables the entire ecosystem to learn and improve.

[06] THE PRODUCT

The App: 10 Modules

Full UI from day one. Scan, journeys, and Digital Twin start with templates and get smarter as the system collects data.

01 LED Booking
Real-time chair availability, 20-min slots, smoothie pre-order at booking

02 Digital Menu
6 smoothies + 5 boosts, journey-based recommendations, favorites + reorder

03 Membership
Core / Premium / Unlimited, credit tracking + auto-deduction, plan upgrades

04 Shop + Replenishment
All products (own + curated), outcome-based browsing, smart protocol-based reminders

05 Events
Calendar, ticketing, RSVP, member-only events, post-event product bundles

06 In-Store Mode
Auto-activates in the space, credits + recommendations, QR product scanning

07 Goal-Based Journeys
10 goal options (Glow, Energy...), 4-week protocols, adaptive weekly check-ins

08 Glow Scan
Selfie → Glow Score (0-100), 3 insights + 3 daily tips, trend analysis over time

09 Progress Tracking
Sleep, stress, energy, skin, gut, weekly Glow Report, daily micro-tasks

10 Digital Twin
Unified user profile, AI optimization over time, feeds adaptive journeys

MEMBERSHIP

Four tiers, credit-based.

FREE	CORE	PRO	PREMIUM
€0	€19/mo	€49/mo	€99/mo
Content access	Glow Scan	Adaptive protocols	Digital Twin
Community browsing	Basic journeys	Progress tracking	AI concierge
Product browsing	LED session credits	Smart replenishment	Exclusive events
Event discovery	Community access	Priority booking	Full biomarker access

PRODUCT ROADMAP

MVP is the skeleton. Intelligence comes later.

MVP, MONTHS 1-4

The Commerce Loop

Booking, menu, shop, membership, events, basic tracking. Commerce-first. The transaction engine running from day one.

V1, MONTHS 5-9

The Intelligence Layer

AI concierge, smart replenishment, glucose-smoothie correlation, curated protocols. Data starts driving personalization.

V2, MONTHS 10+

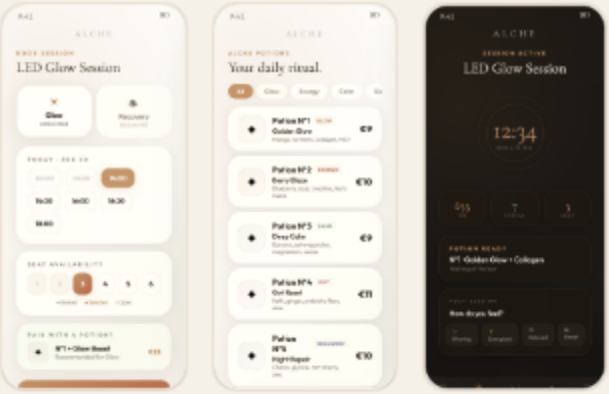
The Full Platform

Biomarker dashboard, bio age score, personalized AI protocols, doctor integration. The flywheel at full velocity.

PHYSICAL SPACE = PHASE 2

The Berlin flagship in Mitte is where the digital meets the physical: LED sessions, functional smoothies, curated products, community events. It operates near breakeven standalone, generates €8,800–11,700/month in subscriber LTV through walk-in conversions, and creates the environmental cues that bridge the 66-day habit formation gap digital-only tools structurally cannot.

MVP CORE SCREENS



V1/V2 INTELLIGENCE LAYER

→ 80% BY Y3

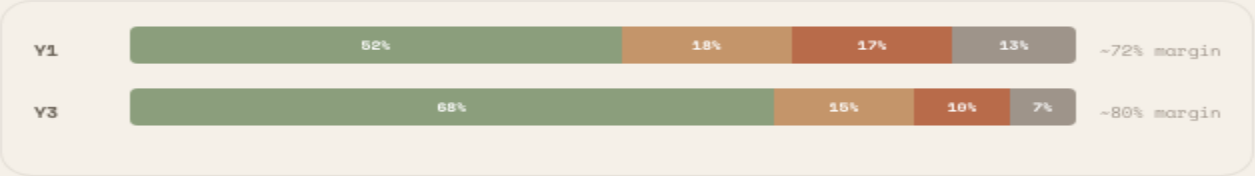
€500K
RAISE TARGET

PRICING

TIER	MONTHLY	VALUE PROPOSITION	GROSS MARGIN
Free	€0	Content, community access, product browsing	.
Core	**€19**	Biomarker dashboard, wearable sync, basic protocols	85-90%
Pro	**€49**	Personalized protocols, AI insights, advanced tracking	85-90%
Premium	**€99**	Blood panel credits, 1:1 reviews, exclusive events, CGM (Phase 2)	70-85%

REVENUE COMPOSITION

Subscription share grows from ~52% to ~68%, shifting valuation toward SaaS-adjacent multiples (8-15x ARR) vs. premium retail (2-4x revenue).



LESSON FROM $1.4B IN FAILURES

Forward Health burned $657M building $1M hardware pods. We partner, we do not build the stack. Lab partnerships for testing, curated products not manufactured, and the physical space generates revenue , it is not a cost center.

CONVERSION

Subscriber funnel at Month 12

+ Direct-to-paid from physical space: est. 30-40 subscribers (modeled target) **Total M12: ~145 paying**

UNIT ECONOMICS

CONSERVATIVE

5.1x

€35 ARPU x 8-month lifetime
LTV €280 / CAC €55

REALISTIC

14.7x

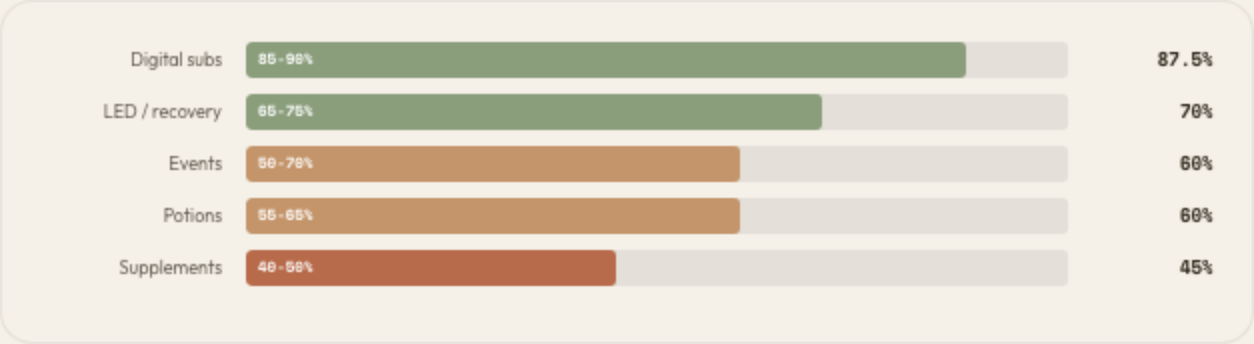
€49 ARPU x 12-month lifetime
LTV €588 / CAC €40

LESSON FROM THE GRAVEYARD

DayTwo had 2,089 citations (Google Scholar, 2026) and still died when GLP-1 drugs arrived. Science is necessary but not sufficient. Community is the only retention moat that survives technology disruption. Our projected 8% monthly churn beats industry average (12-15%) through physical touchpoints, community identity, and longitudinal data compounding.

MARGINS

Gross margin by revenue stream



PATH TO BREAK-EVEN

LAUNCH	BREAK-EVEN	BUFFER AT BREAK-EVEN
M4	M12	€142K
	145 paying + €10K/mo space	

24-month runway with €500K raise. Pre-launch burn: €7,600/month. Break-even achieved through a combination of ~145 paying digital subscribers and ~€10,000/month in physical space revenue (products, services, events). Even at €400K raise, the model reaches break-even with a €42K buffer.

RevenueCat 2025 State of Subscription Apps / Industry churn benchmarks (Recurly, Baremetrics) / DSSV 2024 / Stripe Payment Infrastructure

[08] GO-TO-MARKET

Build the audience before the product.

Content-first. Community-first. The product comes to people who already trust the voice.

Most startups spend money to find customers. We find customers for free, then spend money to build what they already want. Our content-first strategy trades founder labor for capital: every video, newsletter, and community event builds an audience that converts directly into our waitlist, then our founding members, then our recurring revenue.

TWO FLYWHEELS, SEQUENCED

FLYWHEEL 1 , RUNNING NOW

The Content Engine

Create radical-honesty science content → attract health-curious audience → they engage and share → we learn what they need → create sharper content. No product needed. No funding needed.

FLYWHEEL 2 , ACTIVATED BY FUNDING

The Product Engine

Know your body (data) → Do the protocols (action) → Get what you need (products) → Belong with others (community). Funding builds the product for an audience that already exists and trusts us.

CHANNEL STRATEGY

PRIMARY: SHORT-FORM VIDEO

TikTok + Instagram Reels , @alche.space

Radical honesty science content. 3-5 posts per week. Pattern-breaking format: first piece is a collagen deep dive across 23 studies showing only industry-funded research is positive. This IS the brand voice.

SECONDARY: NEWSLETTER

Weekly email , Substack or Beehiiv

One deep dive per week. Captures emails , the only owned asset. Social algorithms change; email lists compound. Where the most engaged followers live and conversion happens.

AMPLIFIER: YOUTUBE

Monthly "Alche Reviewed" long-form

10-20 minute deep research episodes. Evergreen SEO pillars that rank in search for years , the moat no short-form competitor builds.

AMPLIFIER: BERLIN EVENTS

Quarterly "Alche Salon" , EUR 200-500/event

Science talks over wine at existing Berlin venues. One evening generates a month of content. Doubles as customer discovery. Biohackers Berlin meetup (2,213 members) is the warm audience.

EXECUTION ROADMAP

12 months to product-market fit.

Q1 M1-3

Foundation

PRE-FUNDING // EUR 0 BUDGET // CONTENT ENGINE IGNITION

- Launch @alche.space. 3-5 short-form videos per week, honest science format.
- Launch newsletter (Week 2). Goal: 300 subscribers by end of Q1.
- 10 informal customer discovery conversations from social DMs and meetup contacts.

Q2 M4-6

Traction Proof

PRE-FUNDING // EUR 200-500 EVENTS // WAITLIST OPENS

- First Alche Salon event. 30-40 people. Film everything , one event produces 3-4 weeks of content.
- Open waitlist landing page. Goal: 500 signups from newsletter + social + events.
- Begin GmbH formation. Apply to GruendungsBONUS Plus (EUR 50K non-dilutive Berlin grant).

Q3 M7-9

Fundraise + Build

FUNDING CLOSES // EUR 500K RAISE // MVP DEVELOPMENT BEGINS

- Pitch with real numbers: followers, newsletter subs, waitlist, event attendees.
- Post-funding: hire technical co-founder / dev lead. Begin MVP development.
- Events scale to monthly with 60-80 attendees.

Q4 M10-12

Beta Launch

POST-FUNDING // PRODUCT IN HANDS // FOUNDING MEMBERS

- MVP beta to first 50-100 users from waitlist. Founding member pricing: EUR 19/month, locked for life.
- Content evolves to include product teasers, beta user stories, "building in public" updates.
- Physical space search begins. Berlin location planning for hybrid model proof.

TARGET METRICS BY QUARTER

	Q1	Q2	Q3	Q4
Social followers	1-2K	3-5K	8-12K	15-20K
Newsletter subs	300	1,000	2,500	5,000
Waitlist signups	-	500	1,500	(converts)
Event attendees	-	35	250	500+
Paying users	-	-	-	**50-100**
Content CAC	**€0***	**€0***	**€0***	**€0***

*EUR 0 paid acquisition. Content cost is founder labor, not capital.

[09] TRACTION

9 conversations that changed our product.
3 hypotheses we killed.

No product yet. What we bring: proof of market understanding, intellectual honesty, and a 90-day plan to generate the data that matters.

$8.9-21.1K	711K+	18-24 mo
SPENT PER USER/YR ON FRAGMENTED ALTERNATIVES[1]	SUBSCRIBERS ACROSS R/BIOHACKERS, R/LONGEVITY, R/SUPPLEMENTS[2]	WINDOW BEFORE US PLAYERS LOCALIZE TO DACH[3]

CUSTOMER DISCOVERY , 9 INTERVIEWS

Health-conscious professionals in Berlin, 28-45, 60-min open-ended sessions.

01
"Longevity with intention" tested strongest. Interviewees rejected both "biohacker" and "anti-perfectionist" labels.

02
Fragmentation creates guilt, not just inconvenience. People feel like they're failing at wellness because the ecosystem is impossible to navigate.

03
Accountability without judgment. Small consistent groups over leaderboards. Gamification does not work for longevity.

04
Already spending EUR 50-200/mo on fragmented services , willing to consolidate. Non-spenders need a trigger event (content-first GTM).

05
Local community events as entry point got the strongest positive signal of anything tested.

WHAT CHANGED BASED ON INTERVIEWS

Positioning: "longevity with intention" replaced "anti-perfectionist." **Community:** small accountability circles, not open forums. **Entry point:** content + local events first, app second.

[1] Alche competitive spend analysis, Feb 2026 / [2] Reddit subscriber counts, Feb 2026 / [3] Competitive intelligence; no US player has announced DACH expansion

VALIDATED

- Market demand (711K+ community, $8.9-21K/yr fragmented spend)
- Positioning thesis (3 research cycles + 9 interviews)
- "Longevity with intention" language (emerged from interviews)
- Competitive white space (10+ competitors, none integrated)
- Berlin as launch market (ecosystem + timing window)
- GTM sequence: content, events, app
- Medical advisor secured

WHAT FUNDING SOLVES

- Product-market fit (build MVP, test with real users)
- Conversion data (waitlist → signup → paid)
- Retention and engagement metrics
- Unit economics in practice
- Technical build (CTO hire, dev team)
- Physical space proof-of-concept

HYPOTHESES INVALIDATED

~~"Anti-perfectionist" is the right language~~
Killed by interviews. Reactive, confusing. "Longevity with intention" emerged from users' own words.

~~Physical space first, digital second~~
Killed by Berlin failure patterns. Capital-intensive physical retail fails. Model flipped: digital-first.

~~Bootstrap as a lifestyle business~~
Killed by competitive timing. 18–24 month window. Speed to market matters more than capital efficiency.

90-DAY TRACTION ROADMAP

DAY 1-30

Foundation

GmbH formed. 20 interviews complete. Waitlist live. CTO search launched.

DAY 30-60

Traction

Content channel at 1,000+ followers. First Berlin event (50+ attendees). Medical advisor formalized.

DAY 60-90

Momentum

MVP spec finalized, development underway. Community pilot with founding members. Measurable KPIs: waitlist conversion, event attendance, content engagement.

[10] THE MOAT

We do not claim a moat. We have a thesis about what compounds.

At pre-seed, no moat exists yet. What investors evaluate is whether the model has the structural potential to build one.

PHASE 1 // MONTH 0-12

Social Identity

"Being in my Alche era" becomes part of how people talk about themselves. Brand, content, and the physical Berlin space build identity. People do not leave brands they identify with , this is structural, not aspirational.

Taste-dependent. Hardest to copy.

PHASE 2 // MONTH 6-18

Network Effects

As community grows, each new member increases value for existing members. Accountability groups, shared challenges, event networks, protocol sharing. The value of being in the community increases with its size.

Time-dependent. Impossible to fast-track.

PHASE 3 // MONTH 12+

Switching Costs

12 months of biomarker data, personalized protocols, supplement subscriptions, and community connections create real friction to leave. GDPR means data is portable , but insights, calibrated protocols, and social graphs are not.

Volume-dependent. Gets more valuable.

WHAT AI CANNOT REPLACE

If Apple Health + ChatGPT gives personalized longevity advice for free, the pure data-and-insights layer is commoditized. What survives: **physical experiences** (AI cannot give you a smoothie or a community event), **social identity and belonging** (people join for community, not because the algorithm is optimal), **accountability and motivation** (knowing what to do is not the hard part , doing it consistently is).

INTEGRATION IS THE THESIS

None of alche's competitors combine biomarker data + personalized protocols + curated products + physical experiences + community in one platform. They each do one or two layers. Integration is structurally hard to bolt on because it requires different organizational DNA than single-vertical excellence. GDPR-native data trust gives a European entrant a structural advantage US platforms cannot retrofit. When the data layer gets cheaper and AI interpretation improves, the companies that built genuine community, cultural identity, and regulatory trust are the ones still standing.

Competitive analysis: 30+ companies, Feb 2026 / Blue Zones / WHOOP 2025 Retention Data / Fortune Business Insights 2025

[11] THE TEAM

The Team

Brand, data, growth, operations, architecture, medical expertise, and engineering.

Timur Tasdogan

CO-FOUNDER & CMO | 49% EQUITY | FULL-TIME

- MSc Data Science (GISMA Berlin), BA Economics (Koç University, merit scholarship)
- Concentrix/Meta: EUR 1.8M ad spend across 390+ advertisers, ROAS 1.5x to 2.7x
- Hepsiburada (NASDAQ: HEPS): EUR 300K performance budget, 4x ROAS, 29M influencer views
- Quantpaper founding team: 30 user interviews, 27% activation rate lift

Daria Dijan Roth

CO-FOUNDER & COO | 51% EQUITY | FULL-TIME

- BSc Computer Engineering + BA International Business
- Backend development and product architecture (Jan Iletisim Teknolojileri)
- Brand positioning and performance marketing (MUTA-1 Reklamcilik)
- Four-year autoimmune journey: direct domain expertise in longevity wellness

KEY TEAM MEMBERS

Shukri Jarmoukli

MEDICAL ADVISOR / PHYSICIAN

- Operates Lifestyledoctor, a self-pay longevity practice in Berlin
- Functional medicine, psychoneuroimmunology (KPNI), CGM biofeedback, biomarker protocols
- Role: protocol validation, medical content review, regulatory compliance

AmirFarzam Kamalpour

TECHNICAL LEAD

- Self-taught developer since age 12
- Runs Star Digital (stardigital.ir): IT infrastructure, hosting, web and app development
- Previously at Jung von Matt HAVEL (Berlin): IT and web development
- Brings existing server infrastructure to the alche build

GOVERNANCE

ENTITY	Alche GmbH (Berlin, formation in progress)
EQUITY	Daria 51% / Timur 49%
DOMAINS	Timur: brand, data, growth / Daria: vision, architecture, operations / Shared: product

[12] THE ASK

EUR 500,000 to build the category.

Convertible loan (Wandeldarlehen). 24-month runway. Break-even at Month 12.

€500K	€2.5M	20%
PRE-SEED RAISE WANDELDARLEHEN	VALUATION CAP	DISCOUNT TO NEXT ROUND

DEAL TERMS

INSTRUMENT	Wandeldarlehen (convertible loan) , standard German pre-seed structure
AMOUNT	EUR 500,000
VALUATION CAP	EUR 2,500,000
DISCOUNT	20% to next qualified round
RUNWAY	24 months (pre-launch burn: EUR 7,600/month)
BREAK-EVEN	Month 12 , 145 paying subscribers + EUR 10K/month space revenue
BUFFER AT M12	EUR 142,000 (at EUR 500K raise) // EUR 42,000 (at EUR 400K)
USE OF FUNDS	[Detailed allocation shared separately upon request]

WHAT EUR 500K UNLOCKS

Build

Technical co-founder hire. 16-week MVP development sprint. App architecture and biomarker integration. GmbH formation and legal structure.

Launch

Content production scaling. First Alche Salon events. Beta to 50-100 founding members. Community infrastructure.

Prove

Unit economics validation. Churn data vs. industry averages. Conversion funnel metrics. Physical space as acquisition channel proof.

THE INVESTOR EQUATION

Zero European competitors in integrated longevity lifestyle. A 12-18 month window before US players localize. EUR 500K buys 24 months of runway, break-even at Month 12 with a EUR 142K buffer, and a founding team that has already done the research depth of a Series A company. What is missing is execution capital. That is exactly what this raise is for.

Standard German Wandeldarlehen structure / RevenueCat 2025 Benchmarks / Internal financial modeling

[13] CLOSING

The ambition.

Berlin is the proof. Europe is the unlock.

THE ENDGAME

The longevity lifestyle platform for all of Europe.

What Aesop did for skincare , took something technical and made it beautiful, accessible, and identity-forming. That is what alche does for longevity.

FROM HERE TO THERE

PHASE 1 // M0-12

Berlin proof of concept

App launch. One physical space in Mitte. 145 paying subscribers. Break-even on unit economics. Content flywheel spinning. Community density forming.

PHASE 2 // M6-18

Digital expansion across EU

Open app beyond Berlin. Ship products across the EU. Partner with existing wellness spaces. Prove digital-only members retain without a physical node.

PHASE 3 // M12-24

Second location + seed round

Second Berlin location where digital density is highest. Pop-ups before permanent. Seed round at EUR 2M+ MRR trajectory.

PHASE 4 // M18-36

Platform maturity

Open API for partner integrations. Corporate wellness tier. Expand category presence across EU.

What alche is not

Not a wellness brand that happens to have an app. Not a longevity clinic for the already-converted. Not another personalized nutrition play. Not a Silicon Valley export.

What alche is

The digital platform is the business. The physical space is one revenue module. Built in Berlin for European culture, regulation, and sensibility. GDPR-native from day one. An identity brand, not a feature set.

> *"Longevity should not be solely for tech bros of Silicon Valley. It should be for everyone who wants to live better, not just longer."*
