01 / THE INSIGHT

Longevity is no longer **inaccessible.** It is **overwhelming.**

Consumers are not struggling to find options. They are struggling to decide what is worth trusting, combining, and repeating. The problem is not lack of supply. It is lack of intelligent, taste-driven curation developed in consultation with medical professionals.

THREE CONVERGING FORCES

84%

CONSUMERS RANK WELLNESS AS TOP PRIORITY

Demand has exploded. Supply infrastructure has not followed.

Euromonitor 2025

3.1%

OF GERMAN HEALTHCARE SPENDING ON PREVENTION

EUR 474B spent annually, almost none on keeping people well. A structural market failure.

OECD Health at a Glance

0

INTEGRATED LONGEVITY PLATFORMS IN EUROPE

Testing companies, supplement brands, fitness apps, wellness spaces: all disconnected. Nobody connects them.

GWI 2024

"The first brand to structure this behavior, not just supply products, will define the category."

Sources: Euromonitor International, Voice of the Consumer: Health and Nutrition Survey (2025); OECD, Health at a Glance (2023); Global Wellness Institute, Global Wellness Economy Monitor (2024).

WHAT IS BROKEN

"People who want to age well are forced to become full-time project managers of their own health."

THE FRAGMENTATION LANDSCAPE

SUPPLEMENTS 300,000+ SKUs. No guidance on what to combine or why.	**PROTOCOLS** Influencer-driven, contradictory, abandoned within weeks.	**BIOHACKING** Technical, intimidating, requires extensive self-education.
APPS Track data but provide no direction or community.	**WELLNESS SPACES** Offer services but capture no data and build no habits.	**MEDICAL ADVICE** Expensive, episodic, not integrated with daily behavior.

> *"The burden of integration is placed entirely on the individual. The result: decision fatigue, inconsistent routines, abandoned protocols, and short-lived experimentation."*

Sources: Baumel et al. (2019), JMIR mHealth and uHealth; RevenueCat, State of Subscription Apps (2025); Global Wellness Institute, Global Wellness Economy Monitor (2024).

WHY NOW

FORCE 01

Longevity went mainstream.

Peter Attia's *Outlive* became a #1 bestseller. Huberman reaches 10M+ followers. Bryan Johnson made anti-aging a cultural phenomenon. Euromonitor: healthspan is the #1 global consumer trend for 2025.

FORCE 02

Germany's prevention gap is an open market.

EUR 474B on healthcare, 3.1% on prevention. 7.8 hospital beds per 1,000 (nearly double the OECD average). 62% of Germans say the system focuses too much on treatment. The gap is not a policy debate: it is an open market.

FORCE 03

The technology is ready, but nobody has integrated it.

CGM sensors, AI-generated protocols, wearables (sleep, HRV, stress), red light therapy, functional nutrition. All clinically validated. All disconnected.

WHO IS LEFT OUT

LEFT EXTREME

Clinical biohackers who build complex stacks. Technical, intimidating, inaccessible to most.

The Missing Consumer

- Wants fewer options, better selected
- Wants integrated rituals, not scattered products
- Wants authority without medical intimidation
- Wants taste without pseudoscience
- Has purchasing power and aesthetic sensitivity
- High lifetime value. No ecosystem built for them.

RIGHT EXTREME

Mass-market supplement buyers with no structure. Trend-driven, no integration, no retention.

> *"This consumer does not want more products. They want fewer, better ones, selected within a system they trust."*

Sources: Euromonitor International (2025); OECD, Health at a Glance (2023); Destatis, Gesundheitsausgabenrechnung (2023); Global Wellness Institute (2024).

THE CRITICAL QUESTION

Is this a **vitamin** or a **painkiller?**

The pain is real

- **EUR 8,900 to 21,100** spent per user per year on fragmented alternatives
- **66+ days** to form a health habit (Lally et al., 2010). Digital-only tools see **96% churn** before day 66 (RevenueCat 2025).
- Users report **guilt, confusion, and abandonment** as primary emotions around wellness
- **62% of Germans** say the healthcare system fails at prevention

The painkiller

- alche **eliminates the project management burden** by curating the entire stack
- **One membership** replaces 4 to 6 separate subscriptions
- **Physical space** bridges the 66-day habit gap that digital-only tools cannot
- **Medical advisor** ensures clinical integrity, not influencer guesswork

THE VERDICT

"alche is a painkiller for a population that is hemorrhaging time, money, and motivation on wellness fragmentation. The pain is measurable: EUR 8,900 to 21,100 per year in scattered spend, 96% digital churn rates, and a healthcare system structurally designed to treat illness rather than prevent it."

Sources: Lally et al. (2010), European Journal of Social Psychology; RevenueCat, State of Subscription Apps (2025); OECD, Health at a Glance (2023); Destatis (2023); Baumel et al. (2019), JMIR mHealth and uHealth; GWI (2024).

[02] WHO WE SERVE

Longevity for people who actually live.

Not the 1% who cold-plunge at 5 AM. The millions who care about aging well but have been given fragmented tools that deliver data without direction.

PRIMARY PERSONA

Mira

34 / Berlin / Product Designer / EUR 72,000

Runs three times a week. Takes magnesium and vitamin D but is not confident about dosing. Wore an Oura ring for five months, checked her sleep score every morning until it started **giving her anxiety about not sleeping well enough**. The ring is on her nightstand.

Tried Levels for two months. Learned bananas spike her glucose. Thought "...now what?" and cancelled. Has a supplement shelf with six half-empty bottles. She does not want to optimize. She wants to **live fully and age well without it becoming her second job**.

€130	6+	0
MONTHLY SPEND (FRAGMENTED)	DISCONNECTED PROVIDERS	INTEGRATED VIEW

THE REBUNDLING OPPORTUNITY

€126-295
PER MONTH, FRAGMENTED
ACROSS 6-8 PROVIDERS

→

€49-99
PER MONTH, INTEGRATED
ONE PLATFORM

We are not creating new health spending. We are consolidating fragmented budgets into a single integrated relationship, at a lower price point with better outcomes.

WHY BERLIN

The ecosystem is forming here.

Berlin has the highest concentration of health-conscious expats in DACH, a 15-20% English-speaking population matching alche's content language, and lower operational costs that extend runway. The Biohackers Berlin Meetup alone has 2,213 members.

800K	15-20%	2,213
RESIDENTS AGED 25-45	ENGLISH-SPEAKING POPULATION	BIOHACKERS BERLIN MEETUP MEMBERS

MARKET VALIDATION

27% of Germans are willing to pay out-of-pocket for health apps (SpringerMedizin). Berlin tech worker median salary: **EUR 75,000 gross** (GfK). The purchasing power and willingness to pay for curated health experiences are already proven in this market.

SpringerMedizin 2024 / GfK Purchasing Power Study 2024 / Biohackers Berlin Meetup / Berlin Partner / DSSV 2024

[03] THE MARKET

The European longevity market is forming now.

No integrated player exists. That changes within 12-18 months.

THE GERMAN HEALTH PARADOX

Germany spends nearly **EUR 495 billion** on healthcare annually (12.3% of GDP) -- the highest in the EU. Only **4.8%** goes to prevention. With 7.7 hospital beds per 1,000 people (OECD average: 4.2), the system was architecturally built to treat illness, not prevent it. Consumers are filling the gap themselves.

COUNTRY	HEALTH SPEND (% GDP)	LIFE EXPECTANCY	GAP
Germany	12.3%	81.1 yrs	#1 spend, below 5 cheaper systems
Switzerland	11.3%	83.4 yrs	+2.3 yrs, spends less
France	12.1%	82.2 yrs	+1.1 yrs, spends less
Japan	11.5%	84.5 yrs	+3.4 yrs, spends less
OECD avg	9.3%	80.3 yrs	

OECD Health at a Glance 2025 / Destatis 2023 / GWI 2024 Global Wellness Economy Monitor

MARKET SIZING

TAM / SAM / SOM

TAM $6.3T Global wellness economy (GWI 2024). Context marker, not a revenue claim.

SAM €3.2-4.1B

Germany. Supplements (€2.67B), functional beverages (€2.8-3.2B), digital health apps (€263M), premium wellness (€300-500M).

SOM 145 subscribers to break even

From 108K Mitte residents aged 30-44. Conservative: 300 members Y1. Base case: 600. alche consolidates existing spend.

~108K MITTE 30-44 YR OLDS
250-280K HIGH-INCOME HOUSEHOLDS (>€4,500 NET/MO)
~400K PKV HOLDERS IN BERLIN (PREVENTION COVERAGE)

EUROPEAN ADVANTAGE

Not behind, structurally different.

Insurance covers prevention

PKV (8.73M holders) reimburses €200-500/yr in wellness. US consumers pay 100% out-of-pocket.

Centuries of Kur culture

European wellness built on apothecary traditions. alche speaks to that lineage, not Silicon Valley imports.

GDPR as trust differentiator

Only 8% of EU consumers share health data. A GDPR-native platform is a feature, not a compliance cost.

Lower pricing works here

€19-99/mo matches European norms. US players at $199/mo will feel overpriced.

GWI 2024 / Statista 2024 / Euromonitor 2024 / PKV-Verband 2024 / BEUC 2024 / DSSV 2024 / Berlin Partner

[04] COMPETITIVE LANDSCAPE

We mapped the terrain.

30+ companies analyzed. The integrated European longevity platform does not exist yet.

COMPANY	POSITION	SCALE	GAP
Oura	Wearable ring. 5.5M sold, 2M subscribers. Acquired Veri (CGM).	$11B	No lifestyle layer
Hims	Telehealth + DTC. Distribution-first, not community-led.	$2.3B rev	No integration
ZOE	Nutrition AI. Science + warmth. UK-based, nutrition-only.	~$100M rev	Single vertical
AG1	Content-first supplements. $600M revenue, profitable.	$600M rev	No data layer

Oura tells you your sleep score. It does not help you fix it. Each competitor does a piece. Nobody connects data to action to product to community, especially in Europe.

> *"We studied $1.4B in failures so we could build differently."*

WHAT $1.4B TAUGHT US

Seven companies with better funding than us made specific, identifiable, avoidable mistakes. Three survivor patterns emerged:

01 , ASSET-LIGHT

ZOE, AG1, and Levels survived by curating and connecting, not owning the value chain. Forward built $1M hardware pods and collapsed after burning $657M.

02 , CONTENT-LED

AG1 built a $600M business on content and community, not clinical infrastructure. ZOE grew on Tim Spector's authority. Science is necessary but not sufficient, distribution wins.

03 , COMMUNITY-FIRST

When GLP-1 drugs arrived, companies without community had no reason for users to stay. Social fabric is the only retention moat that survives technology disruption.

THE WINDOW

12-18 months before well-funded incumbents integrate European longevity protocols.

Oura has not localized beyond hardware retail. Hims EU expansion is nascent. Levels and Function Health are US-only. Neko Health (Spotify founder) focuses on scanning, not integrated wellness. The full-stack European longevity platform is wide open.

[05] THE SOLUTION

What is alche?

A premium wellness ecosystem that integrates a physical flagship experience, a proprietary mobile application, an outcome-based product brand, and a curated event programme into one data-enabled membership.

FOUR PILLARS

01 PHYSICAL EXPERIENCE

Berlin Mitte Flagship

Functional smoothies, LED red light therapy, curated product shelf, in-person events. The physical touchpoint that builds trust and anchors the brand in daily routine.

Generates behavioral data + walk-in conversions

02 PRODUCT BRAND & MARKETPLACE

Outcome-Based Blends

Proprietary blends (Glow, Energy, Calm, Recovery, Gut, Reset), curated third-party supplements and tools. Organized by outcome, not ingredient.

Product margins + replenishment revenue

03 EVENTS & CULTURE

Community Programme

Wellness workshops, expert talks, community sessions. Each event strengthens retention, deepens brand loyalty, and generates engagement data.

Retention + engagement data

04 APP & MEMBERSHIP

Digital Operating System

LED booking, digital menu, membership management, goal-based journeys, Glow Scan, progress tracking, Digital Twin. The layer that enables scale.

Recurring revenue + global scale

Integrated Information System

Each pillar generates data. The core information system aggregates it, enabling evidence-based decisions across the entire ecosystem.

Each pillar generates data → feeds the core information system → enables evidence-based decisions across the entire ecosystem. No single-vertical competitor can replicate this integration.

THE PHYSICAL EXPERIENCE

Six-step customer journey, zero friction.

01	02	03	04	05	06
Book via App	**Arrive**	**Experience**	**Check-in**	**Browse & Buy**	**Leave & Return**
LED slot + smoothie pre-order	Smoothie ready, LED chair ready	LED mask + functional smoothie, 20 min	Post-session feedback: energy, mood, skin	Product shelf organized by outcome	App reminds, recommends, books next

PRODUCT ECOSYSTEM

SMOOTHIE BAR: 6 ALCHE POTIONS (EUR 7-11)

N°1 Glow, radiance (collagen, berry, vitamin C)
N°2 Focus, clarity (lion's mane, cacao, MCT)
N°3 Calm, stillness (ashwagandha, lavender, reishi)
N°4 Recover, repair (curcumin, tart cherry, ginger)
N°5 Gut, balance (sea moss, prebiotic fibre, aloe)
N°6 Reset, clean (chlorophyll, spirulina, lemon)

FUNCTIONAL BOOSTS (+EUR 2)

Glow: collagen + vitamin C
Energy: lion's mane + maca
Calm: ashwagandha + reishi
Gut: sea moss
Recovery: curcumin

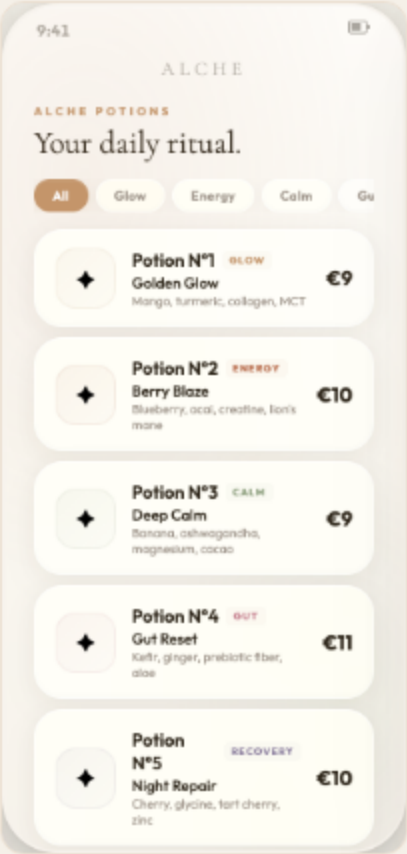
LED SESSIONS

Glow Session: 630–660nm (visible red)
Recovery Session: 810–850nm (near-infrared)

PRODUCT SHELF

Own blends: 300g pouches (at-home versions of each Potion) | Capsules: omega-3, NAC, CoQ10, NR, probiotics | Curated third-party: selected tools and supplements

APP: PHYSICAL EXPERIENCE FLOW



THE APP

Ten modules, one operating system.

01 LED Booking
Real-time availability, 20-min slots, smoothie pre-order integrated into booking flow.

02 Digital Menu
6 smoothies + 5 boosts, journey-based recommendations tailored to selected outcome.

03 Membership
Core / Premium tiers, credit tracking, subscription management.

04 Shop + Replenishment
Own + curated products, outcome-based browsing, automated reorder cycles.

05 Events
Calendar, RSVP, member-only access. Ticketing for workshops and expert talks.

06 In-Store Mode
Auto-activates in physical space, QR scanning for check-in and product lookup.

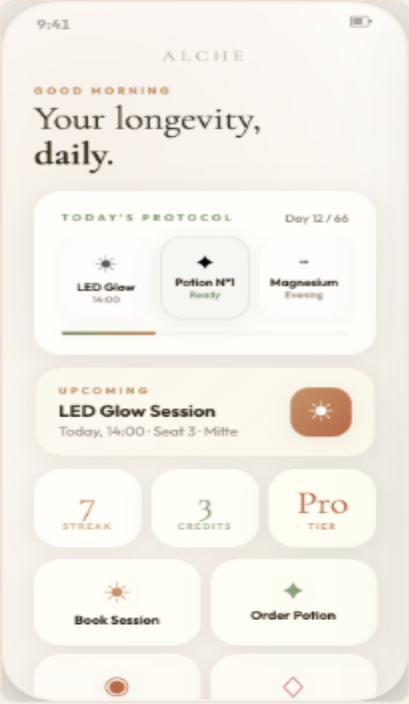
07 Goal-Based Journeys
10 goal options, 4-week protocols combining sessions, products, and tracking.

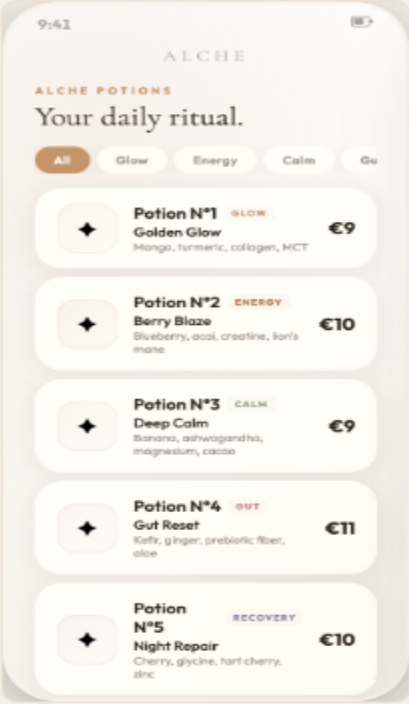
08 Glow Scan
Selfie-based Glow Score (0-100), trend analysis across sessions over time.

09 Progress Tracking
Sleep, stress, energy, skin, gut. Self-reported and wearable-synced metrics.

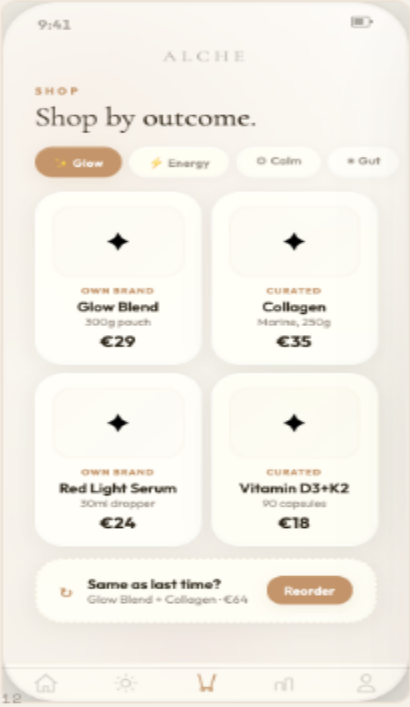
10 Digital Twin
Unified health profile aggregating all data points. AI-driven protocol optimization.

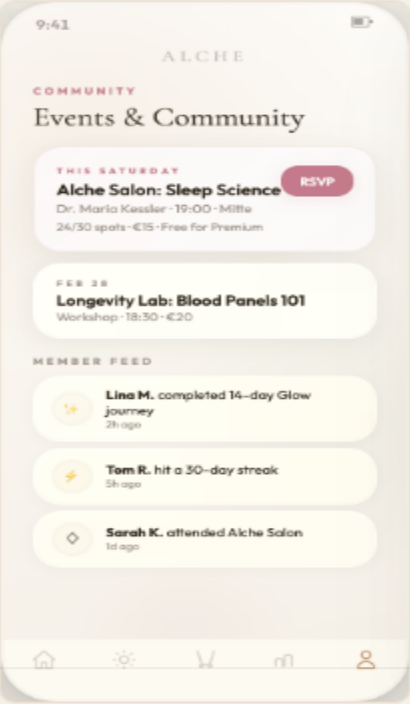
MVP: CORE SCREENS

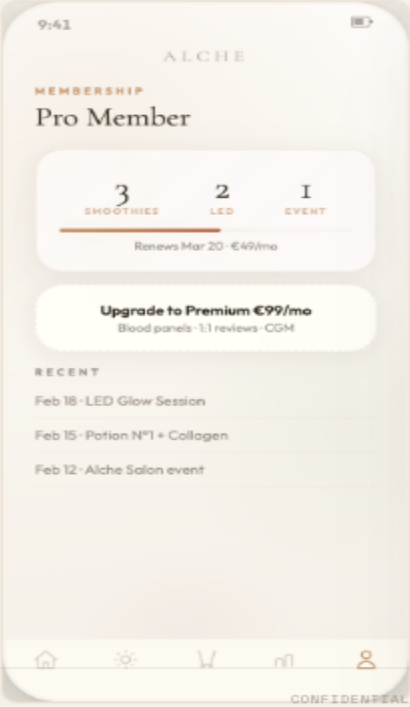




MVP: EXTENDED







[06] THE PRODUCT

Membership & Intelligence

Four membership tiers fund the operating system. An eight-step feedback loop transforms every interaction into personalized insight.

MEMBERSHIP

Four tiers, credit-based.

FREE	CORE	PRO	PREMIUM
€0	€19/mo	€49/mo	€99/mo
Content access	Biomarker dashboard	Personalized protocols	Blood panel credits
Community browsing	Wearable sync	AI insights	1:1 reviews
Product browsing	Basic protocols	Advanced tracking	Exclusive events
Event discovery	Community access	Drop early access	CGM integration (Phase 2)

DATA FEEDBACK LOOP

Eight steps, closed loop.

Every interaction generates data. The feedback loop ensures that each cycle of engagement produces increasingly precise recommendations, driving retention and average order value simultaneously.

01 **Goal Selection** User selects primary outcome → 02 **Personalized Protocol** System generates tailored plan → 03 **Booking** LED session + smoothie reserved → 04 **Experience** In-space session completed

05 **Data Captured** Mood, energy, skin, purchase → 06 **Insights Generated** Patterns identified over time → 07 **Recommendations** Products, sessions, protocols refined → 08 **Re-entry** Next cycle, sharper personalization

Each completed cycle increases data density per user, improving recommendation accuracy. The loop structurally rewards repeat engagement: the more a member uses alche, the more precise and valuable the experience becomes.

PRODUCT ROADMAP

MVP is the skeleton. Intelligence comes later.

MVP: MONTHS 1-4

The Commerce Loop

Booking, menu, shop, membership, events, basic tracking. Commerce-first. The transaction engine running from day one.

Modules: LED Booking, Digital Menu, Membership, Shop, Events, In-Store Mode

V1: MONTHS 5-9

The Intelligence Layer

AI concierge, smart replenishment, glucose-smoothie correlation, curated protocols. The data layer activates.

Modules: Goal-Based Journeys, Glow Scan, Progress Tracking, Smart Replenishment

V2: MONTHS 10+

The Full Platform

Biomarker dashboard, bio age score, personalized AI protocols, doctor integration. The full ecosystem at velocity.

Modules: Digital Twin, AI Concierge, Biomarker Dashboard, CGM Integration

PHYSICAL SPACE: BERLIN MITTE FLAGSHIP

The Berlin flagship is where the digital meets the physical: LED sessions, functional smoothies, curated products, community events. It operates near breakeven standalone, generates EUR 8,800-11,700/month in subscriber LTV through walk-in conversions, and creates the environmental cues that bridge the 66-day habit formation gap digital-only tools structurally cannot address. The space is both a revenue-generating asset and the primary customer acquisition channel.

V1 / V2: INTELLIGENCE LAYER

PATH TO BREAK-EVEN

LAUNCH	BREAK-EVEN	BUFFER AT BREAK-EVEN
M4	M12	€142K
	145 paying + €10K/mo space	

24-month runway with €500K raise. Pre-launch burn: €7,600/month. Break-even achieved through a combination of ~145 paying digital subscribers and ~€10,000/month in physical space revenue (products, services, events). Even at €400K raise, the model reaches break-even with a €42K buffer.

RevenueCat 2025 State of Subscription Apps / Industry churn benchmarks (Recurly, Baremetrics) / DSSV 2024 / Stripe Payment Infrastructure

[08] GO-TO-MARKET

Build the audience before the product.

Content-first. Community-first. The product comes to people who already trust the voice.

Most startups spend money to find customers. We find customers for free, then spend money to build what they already want. Our content-first strategy trades founder labor for capital: every video, newsletter, and community event builds an audience that converts directly into our waitlist, then our founding members, then our recurring revenue.

TWO FLYWHEELS, SEQUENCED

FLYWHEEL 1, RUNNING NOW

The Content Engine

Create radical-honesty science content → attract health-curious audience → they engage and share → we learn what they need → create sharper content. No product needed. No funding needed.

FLYWHEEL 2, ACTIVATED BY FUNDING

The Product Engine

Know your body (data) → Do the protocols (action) → Get what you need (products) → Belong with others (community). Funding builds the product for an audience that already exists and trusts us.

CHANNEL STRATEGY

PRIMARY: SHORT-FORM VIDEO

TikTok + Instagram Reels -- @alche.space

Radical honesty science content. 3-5 posts per week. Pattern-breaking format: first piece is a collagen deep dive across 23 studies showing only industry-funded research is positive. This IS the brand voice.

SECONDARY: NEWSLETTER

Weekly email, Substack or Beehiiv

One deep dive per week. Captures emails, the only owned asset. Social algorithms change; email lists compound. Where the most engaged followers live and conversion happens.

AMPLIFIER: YOUTUBE

Monthly "Alche Reviewed" long-form

10-20 minute deep research episodes. Evergreen SEO pillars that rank in search for years, the moat no short-form competitor builds.

AMPLIFIER: BERLIN EVENTS

Quarterly "Alche Salon" -- EUR 200-500/event

Science talks over wine at existing Berlin venues. One evening generates a month of content. Doubles as customer discovery. Biohackers Berlin meetup (2,213 members) is the warm audience.

EXECUTION ROADMAP

12 months to product-market fit.

Q1 M1-3

Foundation

PRE-FUNDING // EUR 0 BUDGET // CONTENT ENGINE IGNITION

- Launch @alche.space. 3-5 short-form videos per week, honest science format.
- Launch newsletter (Week 2). Goal: 300 subscribers by end of Q1.
- 10 informal customer discovery conversations from social DMs and meetup contacts.

Q2 M4-6

Traction Proof

PRE-FUNDING // EUR 200-500 EVENTS // WAITLIST OPENS

- First Alche Salon event. 30-40 people. Film everything, one event produces 3-4 weeks of content.
- Open waitlist landing page. Goal: 500 signups from newsletter + social + events.
- Begin GmbH formation. Apply to GruendungsBONUS Plus (EUR 50K non-dilutive Berlin grant).

Q3 M7-9

Fundraise + Build

FUNDING CLOSES // EUR 500K RAISE // MVP DEVELOPMENT BEGINS

- Pitch with real numbers: followers, newsletter subs, waitlist, event attendees.
- Post-funding: hire technical co-founder / dev lead. Begin MVP development.
- Events scale to monthly with 60-80 attendees.

Q4 M10-12

Beta Launch

POST-FUNDING // PRODUCT IN HANDS // FOUNDING MEMBERS

- MVP beta to first 50-100 users from waitlist. Founding member pricing: EUR 19/month, locked for life.
- Content evolves to include product teasers, beta user stories, "building in public" updates.
- Physical space search begins. Berlin location planning for hybrid model proof.

TARGET METRICS BY QUARTER

	Q1	Q2	Q3	Q4
Social followers	1-2K	3-5K	8-12K	15-20K
Newsletter subs	300	1,000	2,500	5,000
Waitlist signups	--	500	1,500	(converts)
Event attendees	--	35	250	500+
Paying users	--	--	--	**50-100**
Content CAC	**€0***	**€0***	**€0***	**€0***

*EUR 0 paid acquisition. Content cost is founder labor, not capital.

Biohackers Berlin Meetup / GruendungsBONUS Plus Program / RevenueCat 2025 Benchmarks

[09] TRACTION

9 conversations that changed our product.
3 hypotheses we killed.

No product yet. What we bring: proof of market understanding, intellectual honesty, and a 90-day plan to generate the data that matters.

$8.9-21.1K
SPENT PER USER/YR ON FRAGMENTED ALTERNATIVES[1]

711K+
SUBSCRIBERS ACROSS R/BIOHACKERS, R/LONGEVITY, R/SUPPLEMENTS[2]

18-24 mo
WINDOW BEFORE US PLAYERS LOCALIZE TO DACH[3]

CUSTOMER DISCOVERY , 9 INTERVIEWS

Health-conscious professionals in Berlin, 28-45, 60-min open-ended sessions.

01
"Longevity with intention" tested strongest. Interviewees rejected both "biohacker" and "anti-perfectionist" labels.

02
Fragmentation creates guilt, not just inconvenience. People feel like they're failing at wellness because the ecosystem is impossible to navigate.

03
Accountability without judgment. Small consistent groups over leaderboards. Gamification does not work for longevity.

04
Already spending EUR 50-200/mo on fragmented services , willing to consolidate. Non-spenders need a trigger event (content-first GTM).

05
Local community events as entry point got the strongest positive signal of anything tested.

WHAT CHANGED BASED ON INTERVIEWS

Positioning: "longevity with intention" replaced "anti-perfectionist." **Community:** small accountability circles, not open forums. **Entry point:** content + local events first, app second.

[1] Alche competitive spend analysis, Feb 2026 / [2] Reddit subscriber counts, Feb 2026 / [3] Competitive intelligence; no US player has announced DACH expansion

VALIDATED

- Market demand (711K+ community, $8.9-21K/yr fragmented spend)
- Positioning thesis (3 research cycles + 9 interviews)
- "Longevity with intention" language (emerged from interviews)
- Competitive white space (10+ competitors, none integrated)
- Berlin as launch market (ecosystem + timing window)
- GTM sequence: content, events, app
- Medical advisor secured

WHAT FUNDING SOLVES

- Product-market fit (build MVP, test with real users)
- Conversion data (waitlist → signup → paid)
- Retention and engagement metrics
- Unit economics in practice
- Technical build (CTO hire, dev team)
- Physical space proof-of-concept

HYPOTHESES INVALIDATED

~~"Anti-perfectionist" is the right language~~

Killed by interviews. Reactive, confusing. "Longevity with intention" emerged from users' own words.

~~Physical-space first, digital-second~~

Killed by Berlin failure patterns. Capital-intensive physical retail fails. Model flipped: digital-first.

~~Bootstrap as a lifestyle business~~

Killed by competitive timing. 18-24 month window. Speed to market matters more than capital efficiency.

90-DAY TRACTION ROADMAP

DAY 1-30

Foundation

GmbH formed. 20 interviews complete. Waitlist live. CTO search launched.

DAY 30-60

Traction

Content channel at 1,000+ followers. First Berlin event (50+ attendees). Medical advisor formalized.

DAY 60-90

Momentum

MVP spec finalized, development underway. Community pilot with founding members. Measurable KPIs: waitlist conversion, event attendance, content engagement.

[10] THE MOAT

We do not claim a moat. We have a thesis about what compounds.

At pre-seed, no moat exists yet. What investors evaluate is whether the model has the structural potential to build one.

PHASE 1 // MONTH 0-12

Social Identity

"Being in my Alche era" becomes part of how people talk about themselves. Brand, content, and the physical Berlin space build identity. People do not leave brands they identify with, this is structural, not aspirational.

Taste-dependent. Hardest to copy.

PHASE 2 // MONTH 6-18

Network Effects

As community grows, each new member increases value for existing members. Accountability groups, shared challenges, event networks, protocol sharing. The value of being in the community increases with its size.

Time-dependent. Impossible to fast-track.

PHASE 3 // MONTH 12+

Switching Costs

12 months of biomarker data, personalized protocols, supplement subscriptions, and community connections create real friction to leave. GDPR means data is portable, but insights, calibrated protocols, and social graphs are not.

Volume-dependent. Gets more valuable.

WHAT AI CANNOT REPLACE

If Apple Health + ChatGPT gives personalized longevity advice for free, the pure data-and-insights layer is commoditized. What survives: **physical experiences** (AI cannot give you a smoothie or a community event), **social identity and belonging** (people join for community, not because the algorithm is optimal), **accountability and motivation** (knowing what to do is not the hard part, doing it consistently is).

INTEGRATION IS THE THESIS

None of alche's competitors combine biomarker data + personalized protocols + curated products + physical experiences + community in one platform. They each do one or two layers. Integration is structurally hard to bolt on because it requires different organizational DNA than single-vertical excellence. GDPR-native data trust gives a European entrant a structural advantage US platforms cannot retrofit. When the data layer gets cheaper and AI interpretation improves, the companies that built genuine community, cultural identity, and regulatory trust are the ones still standing.

Competitive analysis: 30+ companies, Feb 2026 / Blue Zones / WHOOP 2025 Retention Data / Fortune Business Insights 2025

[11] THE TEAM

Founding Team

Brand, growth, operations, technology, and medical expertise. The team required to build and scale alche.

Timur Tasdogan

CO-FOUNDER & CMO, 49% EQUITY, FULL-TIME

MSc Data Science (GISMA Berlin), BA Economics (Koc University). Quantitative growth expertise across performance marketing, brand strategy, and data analytics.

Concentrix (for Meta) Consulting
EUR 1.8M ad spend across 390+ advertisers. Average ROAS improved from 1.5x to 2.7x.

Hepsiburada NASDAQ: HEPS
EUR 300K performance budget, 4x ROAS. Influencer campaigns: 29M views.

Quantpaper Pre-Seed
Founding team. 30 user interviews, 27% activation lift.

Daria Dijan Roth

CO-FOUNDER & COO, 51% EQUITY, FULL-TIME

BSc Computer Engineering, BA International Business. Systems-oriented operator with production software experience and deep domain expertise from a four-year autoimmune health journey.

Jan Iletisim Teknolojileri Software
Production backend systems. Development and product architecture for live user-facing applications.

MUTA-1 Reklamcilik Agency
Brand positioning and performance marketing. Acquisition and retention funnel design.

AmirFarzam Kamalpour

TECHNICAL LEAD

Self-taught developer since age 12. Brings existing server infrastructure to the alche build.

Star Digital (stardigital.ir) Founder
IT infrastructure, hosting, web and app development.

Jung von Matt HAVEL, Berlin Agency
IT and web development.

Shukri Jarmoukli

MEDICAL ADVISOR, PHYSICIAN

Studied Medicine, Universitat zu Koln. Runs Lifestyledoctor, a self-pay longevity practice in Berlin. Specializes in functional medicine, CGM biofeedback, and clinical psychoneuroimmunology (KPNI). Protocol design validation and biomarker interpretation.

GOVERNANCE

ENTITY	Alche GmbH (Berlin)
EQUITY	Daria 51% / Timur 49%
HISTORY	10-year personal friendship preceding the venture

[12] THE ASK

EUR 500,000 to build the category.

Convertible loan (Wandeldarlehen). 24-month runway. Break-even at Month 12.

€500K	€2.5M	20%
PRE-SEED RAISE WANDELDARLEHEN	VALUATION CAP	DISCOUNT TO NEXT ROUND

DEAL TERMS

INSTRUMENT	Wandeldarlehen (convertible loan) -- standard German pre-seed structure
AMOUNT	EUR 500,000
VALUATION CAP	EUR 2,500,000
DISCOUNT	20% to next qualified round
RUNWAY	24 months (pre-launch burn: EUR 7,600/month)
BREAK-EVEN	Month 12, 145 paying subscribers + EUR 10K/month space revenue
BUFFER AT M12	EUR 142,000 (at EUR 500K raise) // EUR 42,000 (at EUR 400K)
USE OF FUNDS	[Detailed allocation shared separately upon request]

WHAT EUR 500K UNLOCKS

Build

Technical co-founder hire. 16-week MVP development sprint. App architecture and biomarker integration. GmbH formation and legal structure.

Launch

Content production scaling. First Alche Salon events. Beta to 50-100 founding members. Community infrastructure.

Prove

Unit economics validation. Churn data vs. industry averages. Conversion funnel metrics. Physical space as acquisition channel proof.

THE INVESTOR EQUATION

Zero European competitors in integrated longevity lifestyle. A 12-18 month window before US players localize. EUR 500K buys 24 months of runway, break-even at Month 12 with a EUR 142K buffer, and a founding team that has already done the research depth of a Series A company. What is missing is execution capital. That is exactly what this raise is for.

Standard German Wandeldarlehen structure / RevenueCat 2025 Benchmarks / Internal financial modeling

[13] CLOSING

The ambition.

Berlin is the proof. Europe is the unlock.

THE ENDGAME

The longevity lifestyle platform for all of Europe.

What Aesop did for skincare, took something technical and made it beautiful, accessible, and identity-forming. That is what alche does for longevity.

FROM HERE TO THERE

PHASE 1 // M0-12

Berlin proof of concept

App launch. One physical space in Mitte. 145 paying subscribers. Break-even on unit economics. Content flywheel spinning. Community density forming.

PHASE 2 // M6-18

Digital expansion across EU

Open app beyond Berlin. Ship products across the EU. Partner with existing wellness spaces. Prove digital-only members retain without a physical node.

PHASE 3 // M12-24

Second location + seed round

Second Berlin location where digital density is highest. Pop-ups before permanent. Seed round at EUR 2M+ MRR trajectory.

PHASE 4 // M18-36

Platform maturity

Open API for partner integrations. Corporate wellness tier. Expand category presence across EU.

What alche is not

Not a wellness brand that happens to have an app. Not a longevity clinic for the already-converted. Not another personalized nutrition play. Not a Silicon Valley export.

What alche is

The digital platform is the business. The physical space is one revenue module. Built in Berlin for European culture, regulation, and sensibility. GDPR-native from day one. An identity brand, not a feature set.

> *"Longevity should not be solely for tech bros of Silicon Valley. It should be for everyone who wants to live better, not just longer."*
>
