alche

Longevity, simplified.

EDITORIAL COMMERCE FOR LONGEVITY
BUILT IN BERLIN · FOR EUROPE

PRE-SEED · €500K · APRIL 2026
CONFIDENTIAL

§ 01 · THE PROBLEM

The longevity market is **loud, clinical, and expensive.**

Europe has a €50B+ supplement market and 66% of Germans taking vitamins — but no editorial curator worth trusting.

Consumers bounce between Amazon algorithms, pharmacist defaults, and influencer chaos. The one thing that should be simple — a daily longevity protocol that actually works — is the one thing nobody has solved.

Overwhelm

Thousands of SKUs, conflicting claims, no clear starting point. 73% of consumers report decision paralysis when buying health products online.

Trust gap

Influencer wellness trust is collapsing. 93% read reviews; 85% won't buy without ratings. No source of editorial authority in European wellness.

Gatekept pricing

Personalized longevity plans cost €1,000+ through concierge services. Everyone else gets generic advice and Amazon.

No editorial authority

Europe has no Goop, no Thrive Market, no Wirecutter-for-wellness. The editorial layer that makes commerce trustworthy simply doesn't exist yet.

WHAT'S MISSING

A free, intelligent, editorially curated way to get from *"I want to live longer and feel better"* to *"these three products arrive on Thursday."*

§ 02 · THE INSIGHT

We **give intelligence away.** And monetize the decision.

> *Longevity shouldn't feel like a lab report. It should feel like your smartest friend. And your smartest friend tells you what to buy.*

Every longevity app to date has tried to monetize *intelligence* behind a paywall. We give intelligence away. We monetize the **decision** — the moment of purchase — where the customer already wants to act.

WHY THIS WORKS

Sephora's free app drives 80% of North American sales. AG1 spends $2.2M/mo on free content to sell $600M in products. Content isn't marketing — it's the sales engine. The Ordinary hit €700M by giving ingredient transparency away and selling the product.

§ 03 · THE SOLUTION

Free intelligence. **Curated commerce.** Transparent margins.

Alche — the European longevity platform. App stays free. Revenue from editorial retail + thin membership.

PILLAR 01

Free AI protocol

Onboarding generates a personalized daily protocol — supplements, timing, habits — grounded in peer-reviewed research. No paywall, no feature gate.

PILLAR 02

Curated commerce

AI recommends specific products from Alche's editorially vetted shelf. Every product tied to studies. Every margin disclosed. Research-backed decisions, not algorithmic ones.

PILLAR 03

Membership flywheel

€5-9/mo membership unlocks discounted pricing, bio-age tracking, and priority access. Small fee, disproportionate commitment. Costco's proof, applied to longevity.

THE BRIDGE

Research → Protocol → Product — one continuous thread.

"Here's what your body needs. Here's the science. It arrives Thursday."

§ 04 · HOW IT WORKS

Four steps. **No friction.**

STEP 01 · ~3 MINUTES

Tell us about you

Onboarding captures goals, lifestyle, and health context. Optional biomarker import (Oura, Apple Health, lab results) enriches the model.

STEP 02 · INSTANT

Get your protocol

AI generates a personalized plan — supplements, timing, routines, priorities. Every recommendation linked to research. Updateable in seconds.

STEP 03 · THE COMMERCE MOMENT

Shop the shelf

Curated products matched to your protocol. Transparent cost + Alche margin shown on every SKU. Subscribe-and-save locks reorder.

STEP 04 · ONGOING

Live it daily

Track adherence, reorder, evolve. Membership layer adds bio-age tracking, advanced insights, priority access. Free tier never expires.

§ 05 · PRODUCT

What it looks like. **What it does.**

SCREEN 01

Protocol view
daily plan + timing
evidence panel

SCREEN 02

Product shelf
curated SKUs
cost + margin visible

SCREEN 03

Evidence library
studies per product
adaptive learning

BETA STATUS · APR 2026

iOS MVP live on TestFlight. Protocol engine tested with 40 beta users. Commerce layer integrated in design system, wiring to suppliers underway.

§ 06 · KEY FEATURES

Six things.
That's the product.

CORE · FREE

AI-personalized protocols

Daily supplement, routine, and lifestyle plans. Tailored to goals, biomarkers, and ongoing feedback. Protocol evolves with adherence data.

CORE · FREE

Evidence library

Every recommendation links to peer-reviewed research. Transparent, challengeable, updated. The editorial layer that earns trust.

COMMERCE · FREE

Curated shelf

30-50 editorially vetted products at launch. Every SKU tied to specific protocols. Margin visible on every page.

COMMERCE · FREE

Transparent margins

Product cost + Alche markup shown publicly. German consumers reward transparency — 60-75% will switch brands for a better deal. Disclosure is the moat.

CORE · FREE

Adaptive learning

Protocol evolves with adherence data, feedback, reorder patterns, and outcomes. AI gets smarter with every interaction.

PREMIUM · €5-9/MO

Digital twin

Bio-age score, predictive model, advanced insights. Membership-tier feature that extends the free product — not a paywall on it.

§ 07 · COMPETITIVE

No one in Europe combines **science + curation + commerce.**

DIMENSION	ALCHE	SUNDAY NATURAL (DE)	AG1 (US)	THRIVE MARKET (US)	THE ORDINARY	XIAOHONGSHU
Free AI protocol	✓	—	—	—	—	—
Editorial curation	✓	partial	single SKU	✓	n/a (maker)	✓
Transparent margins	✓	—	—	—	✓	—
EU-native	✓	✓	—	—	—	—
Content→commerce flywheel	✓	partial	✓	partial	partial	✓
Multi-brand curated shelf	✓	— (own-brand only)	— (single SKU)	✓	— (own-brand only)	✓
Own-brand (Phase 2)	planned	✓	✓	✓	✓	—

Positioning line

Alche is **"Xiaohongshu for longevity in Europe"** — editorial commerce with AI as the curator. **Sunday Natural is single-brand vertical commerce.** We are multi-brand, editorially curated, AI-led. Different game, same city.

HONEST READ ON SUNDAY NATURAL (BERLIN)

Sunday Natural is a **~€680M revenue business (2023), acquired by CVC for ~€800M in April 2024.** They are 10 years ahead. They are also **structurally a single-brand vertical retailer** — DTC-only, no curated shelf, no editorial layer. Alche's multi-brand editorial play lives in the space their model structurally can't occupy. They are not the competitor; they are the proof that German longevity commerce is huge.

Sources: company websites, press coverage (TechCrunch, Sifted, SCMP) · revenue-model-research.md · public financial filings.

§ 08 · MARKET

A €7.2B home market, with €50B+ of European tailwind.

€380B	€52B	€7.2B	€50M
TAM — EU HEALTH & WELLNESS 2026 est.	SAM — EU SUPPLEMENTS + DIGITAL WELLNESS supplements €35B + digital €17B	GERMANY SUPPLEMENTS (HOME) 9.2% CAGR	SOM — YEAR 3 TARGET GMV 75K × €70 × 6 × 15%

THE TAILWINDS

Germany = #1 functional drinks in EU

21.7% of European functional beverage market. 66-70% of population uses vitamins/minerals/supplements. Cultural acceptance is already here.

Online share growing 12.6% CAGR

30-35% of supplement sales online and climbing. German consumers want e-commerce + trust — exactly Alche's intersection.

European white space

AG1, Ritual, Thrive Market are all US-first. iHerb does 82% of revenue internationally but has no European editorial layer. No EU brand combines science + curation + commerce.

Trust is redistributing

83% of Germans trust their pharmacist — the highest-trusted health source. Alche rebuilds that infrastructure for the digital native. Editorial authority replaces clinical gatekeeping.

Sources: Statista 2024-2026 · EU Commission food supplement market report · German BVL market data · revenue-model-research.md §4.

§ 09 · AUDIENCE

Three people.
Different friction, same solution.

PERSONA 01

The Optimizer

28-42 · urban · already in the game

Takes 3+ supplements. Tracks sleep and HRV with Oura or Apple Watch. Frustrated by fragmentation — brand-juggling across 5 providers.

Wants: a unified protocol with clear priorities.

€80-150
MONTHLY SPEND

40%
OF Y1 USERS

PERSONA 02

The Curious Beginner

26-38 · health-conscious · overwhelmed

Wants to start but doesn't know where. Reads Huberman, scrolls Reddit, follows influencers — but never buys.

Wants: an evidence-based starting point without judgment.

€40-70
MONTHLY SPEND

35%
OF Y1 USERS

PERSONA 03

The Busy Professional

30-45 · high-performer · outsources

Has the money and no time. Currently paying €1K+ for concierge services that deliver the same research-backed advice Alche's AI can give in 3 minutes.

Wants: concierge quality at consumer pricing.

€100-200
MONTHLY SPEND

25%
OF Y1 USERS

GEOGRAPHY · Y1-Y2

Primary: Germany, Austria, Switzerland, Netherlands, UK. Language launch: EN + DE at Day 1. FR + NL by Month 6.

§ 10 · GO-TO-MARKET

Three phases. Content compounds. Commerce captures.

PHASE 01 · MONTHS 0-3

Foundation

Waitlist growth via editorial content. 15-20 curated SKU launch. Berlin-first community — supplement masterclasses with MDs, longevity researcher AMAs. **Outcome:** 3K waitlist, 20 SKUs live, 500 paying customers.

PHASE 02 · MONTHS 4-9

Acceleration

Membership tier launch (€5-9/mo, digital twin perk). Expand SKU count to 50+. Influencer seeding with aligned EU voices. Content library compounds SEO. **Outcome:** 10K active paying customers, €250K MRR, membership at 10%+ conversion.

PHASE 03 · MONTHS 10-18

Compounding

Own-brand 2-3 hero products launch (Magnesium, Omega-3). DACH expansion. B2B wellness pilot with 1-2 German employers. **Outcome:** 30K actives, €1M MRR, own-brand at 20% of mix, Series A readiness.

PRIMARY CHANNELS · CAC TARGET €35 BLENDED

→ **Long-form content** — blog, YouTube essay format, SEO compounds over 18 months

→ **Berlin community events** — masterclasses, advisor salons, free-to-attend

→ **Podcast partnerships** — EU longevity voices, not US imports

→ **Referral program** — member-exclusive products unlock with referrals

→ **Editorial media** — Sifted, ZEIT Wissen, Monocle Weekly placements

→ **Paid** — accelerator, not engine. Meta/Google for protocol quiz entry.

§ 11 · BUSINESS MODEL

App is free.
Retail is the business.

Revenue composition shifts from curated-heavy to own-brand-heavy as the flywheel compounds.

REVENUE COMPOSITION — Y1 → Y3

STREAM	YEAR 1	YEAR 2	YEAR 3
Curated third-party product sales	45%	35%	30%
Own-brand product sales (launches Q1 '27)	20%	35%	40%
Membership (€5-9/mo, digital twin + perks)	15%	15%	15%
Physical space (events, services — Phase 2)	15%	10%	10%
Premium tier (advanced insights, CGM integration)	5%	5%	5%
Total revenue composition	**100%**	**100%**	**100%**

GROSS MARGIN BY STREAM

25-45%	60-80%	~55%	90%+
CURATED THIRD-PARTY	OWN-BRAND (PHASE 2)	BLENDED Y2 (BASE)	MEMBERSHIP
wholesale markup	private label economics	60% by Y3	nearly pure margin

Sources: revenue-model-research.md §2 · 100+ comp references (AG1, Ritual, Thrive, The Ordinary, iHerb, Sephora, Xiaohongshu) · Confidence flagged VERIFIED / LIKELY / ESTIMATE per metric.

§ 12 · THE FLYWHEEL

Free content **compounds** into owned revenue.

```
Science content (free, open)
  → builds trust + SEO
    → free app download
      → genuine wellness value delivered
        → AI recommends products matched to protocol
          → customer purchases curated SKU
            → subscribe-and-save locks reorder
              → data feeds better recommendations
                → content library expands
                  → loop compounds
                    ↻ Xiaohongshu pattern at European scale
```

KEY PROOF · WHY THIS WORKS

Sephora's free app drives 80% of North American sales.
AG1 spends $2.2M/mo on free content to sell $600M in products.
The Ordinary hit €700M by giving ingredient transparency away.
Xiaohongshu reached $31B valuation on content→commerce — in 14 months.

Content isn't marketing. It's the sales engine.

§ 13 · TRACTION

Where we are.
Where we land by Q3.

LIVE TODAY · APRIL 2026

- ✓ MVP live on TestFlight (iOS)
- ✓ AI protocol engine functional — personalized outputs verified
- ✓ Protocol tested with 40 beta users
- ✓ 20 supplier conversations underway (curated shelf)
- ✓ Berlin advisory network in formation (MDs, nutritionists)
- ✓ Design system complete + production-ready
- ✓ Revenue model validated (100+ comp refs, Apr '26)

NEXT 90 DAYS · POST-CLOSE

- → Close €500K pre-seed
- → 10-15 wholesale supplier agreements executed
- → 3PL onboarded (supplement-specialist, DE warehouse)
- → Public waitlist opened — 3K target
- → Content engine launches (blog + newsletter)
- → First merchandising lead hired (contractor-to-FT)
- → Membership tier design finalized

§ 14 · ROADMAP

18 months to **Series A readiness.**

QUARTER	MILESTONE	KPI GATE
Q2 2026	Public waitlist · 20-SKU curated shelf launch · membership beta	3K waitlist · 500 paying
Q3 2026	App Store public launch (iOS, DE+EN) · first 10K members	10K actives · €250K MRR
Q4 2026	Android launch · 50+ SKU catalog · EU-wide shipping	20K actives · €500K MRR
Q1 2027	Own-brand Hero #1 (Magnesium) · Berlin pop-up series · B2B wellness pilot	30K actives · €1M MRR
Q2 2027	Own-brand Hero #2 (Omega-3) · DACH expansion · Series A prep	€50M GMV run-rate

SERIES A THESIS — WHAT THEY'LL BUY

€50M GMV run-rate + 30K actives + own-brand at 30% of mix + membership at 12% conversion = commerce + membership + AI multiple (3-5x revenue, not 1-2x). Series A target: €5-8M at €25-40M post.

§ 15 · FINANCIALS

Retail economics. **Honest numbers.**

Base case below. Conservative and optimistic scenarios + full 24-month model in appendix.

METRIC	Y1 (2026)	Y2 (2027)	Y3 (2028)
Active customers (paying)	8,000	35,000	90,000
Orders / year / customer	4.5	6.0	7.5
Average Order Value	€68	€72	€78
GMV	**€2.4M**	**€15.1M**	**€52.7M**
Gross revenue (Alche take)	€780K	€5.8M	€22.2M
Blended gross margin	48%	55%	60%
Gross profit	€375K	€3.2M	€13.3M
OPEX	€750K	€2.4M	€6.0M
EBITDA	**(€375K)**	**€800K**	**€7.3M**

THREE SCENARIOS · Y3

€14M	€22M	€38M
CONSERVATIVE Y3 REVENUE	BASE Y3 REVENUE	OPTIMISTIC Y3 REVENUE
(€200K) EBITDA	€7.3M EBITDA · 33% margin	€14M EBITDA

Swing factors: own-brand mix Y3 · 90-day reorder rate · CAC stability. Full sensitivity matrix in financial appendix.

§ 16 · UNIT ECONOMICS

The math works **from Day 1.** No 23-month CAC payback.

€35	€68	6x	<3mo
CAC BLENDED €45 conservative	AOV (LAUNCH) €78+ with own-brand	ORDERS/YEAR 4-9 range	PAYBACK PERIOD derived

€350	10:1	45%	€8
LTV BASE €550 optimistic	LTV : CAC 4.4:1 conservative · 22:1 opt	90-DAY REORDER TARGET industry benchmark	FULFILLMENT / ORDER FLEX / byrd verified

WHAT'S HONEST — AND WHAT WE DROPPED

v5 claimed **12-15x LTV:CAC with 85% gross margin**. That was SaaS math applied to a retail business. It doesn't survive a first due diligence call.

v6 says: **10:1 LTV:CAC at 55% blended gross margin**. Sephora-tier. Costco-tier. The Ordinary-tier. That's what actually wins in editorial commerce — and the numbers survive scrutiny.

Reorder rate data: industry benchmarks from Recurring Revenue Quarterly · CAC estimates: base case from content-first acquisition channels · Fulfillment: FLEX Logistik & byrd published rate cards (Apr 2026).

§ 17 · TEAM

One founder.
Zero-to-MVP, solo.

FOUNDER & CEO

Timu

Product builder, brand strategist, AI-native operator. Built Alche zero-to-MVP solo — product, design, engineering, strategy, supplier research. Berlin-based. Prior: editorial and brand work across EU fashion, wellness, and harm reduction communities.

Circassian heritage. Queer perspective. Builds for underserved wellness markets — not pivoting into wellness, arriving from inside it.

PLANNED HIRES · POST-SEED

Head of Merchandising

Ex-Sephora / ex-Thrive / ex-AG1. Curation + supplier relationships. First hire, contractor-to-FT path.

Head of Longevity Science

MD or PhD advisory chair. Research integrity, content authority, product review — the name on the door.

Growth Lead

Content-first marketer. SEO + community + DTC wellness background. Second hire by Month 6.

§ 18 · WHY NOW

Five things happening **at the same time.**

DRIVER 01 · AI MATURITY

LLMs synthesize research at scale

First generation of consumer wellness where intelligence isn't the bottleneck. Personalization at a marginal cost near zero.

DRIVER 02 · EUROPEAN WHITE SPACE

No EU winner yet

AG1, Ritual, Thrive Market are US-first with minimal EU presence. No European brand combines science + curation + commerce. The gap is obvious and undefended.

DRIVER 03 · TRUST SHIFT

Pharmacist trust moves digital

83% of Germans trust their pharmacist — the highest-trusted health source in the country. Alche replicates that trust infrastructure for the digital native.

DRIVER 04 · CONTENT COLLAPSE

Influencer trust is cracking

€50B+ European supplement market. Influencer authority collapsing. Editorial authority — transparent, evidence-backed — is the moat that fills the void.

DRIVER 05 · POST-SUBSCRIPTION ERA

Retail + thin membership wins

Consumers over SaaS fatigue. Costco renewal: 92.9%. Amazon Prime spend: 2.3x non-members. Retail + content + optional membership is what works now.

§ 19 · VISION

The **European longevity platform.**

> *Alche becomes the operating system for European longevity — the single place where science, habit, personal data, and curated products converge.*

THE LONG GAME

From **app** → to **editorial platform** → to **own-brand standard** → to **protocol canon.**

Alche's protocol becomes the Wirecutter of longevity — the standard European consumers reach for when they want to know what actually works. Editorial authority, compounded over a decade, becomes the infrastructure the next generation builds on.

§ 20 · THE ASK

Raising €500K pre-seed. MVP → revenue-generating retail in 18 months.

€500K

Pre-seed round

SAFE @ €3.5-4.5M cap, or priced preferred · 15-20% dilution target · 18-month runway to Series A readiness

USE OF FUNDS

25% €125K

Inventory + supplier advances

First 20 SKU stock · supplier onboarding · 3PL integration · initial buffer inventory for bestseller SKUs

25% €125K

Engineering

iOS polish · Android build · AI engine extension · commerce + membership infrastructure

25% €125K

Growth & content

Content engine · waitlist conversion · Berlin community events · EU influencer seeding · referral program

15% €75K

Team

Merchandising lead (contractor-to-FT) · advisory compensation · content writer retainer

10% €50K

Operations + legal

BVL notifications · GmbH setup · legal review (wholesale contracts, EU health claims) · accounting

§ 21 · WHY ALCHE

Xiaohongshu for longevity in Europe.

European white space

€50B+ market, no editorial-commerce winner. AG1 / Ritual / Thrive stay US-focused. Sunday Natural is vertical-only. The seat at the intersection is empty — we take it.

Real revenue from Day 1

Retail model means transactions immediately. No 23-month CAC payback masquerading as "investment." Every marketing euro gets repaid within 3 months in the base case.

The multiple math

Commerce + membership + AI = 3-5x revenue multiple territory (vs 1-2x for traditional retail). The premium is captured by the model, not claimed on the pitch.

Founder-market fit

Solo-built MVP under real constraints. Berlin-native. Queer-built for underserved wellness. Not a pivot — a conviction, shipping since February.

> *This is the company that eats the 10-year gap between what AG1 proved works and what Europe hasn't built yet.*

§ 22 · SOCIAL PROOF

In the wild.
(traction fills this page.)

PLACEHOLDER · FILLS AS TRACTION BUILDS

This page stays lean until real signal lands. Post-close, this becomes the page that sells the story after the numbers: press mentions, beta user testimonials, advisor endorsements, supplier partner quotes. Not vanity — validation.

Press

Sifted · ZEIT · Monocle · TechCrunch EU — targeting Q3 '26 launch coverage.

Users

40 beta testers. Quotes curated and permission-secured before inclusion.

Advisors

Berlin medical + science advisory forming. Names added when commitments are written.

§ 23 · CONTACT

Let's talk.

HOW TO REACH US

Founder	Timu · CEO & Product
Email	[founder@alche.health]
Website	alche.health · coming soon · waitlist live
App	TestFlight beta · invite on request
Location	Berlin, Germany
Language	EN / DE / TR — pitch in any of these, or whichever works for your team

> *The future of longevity is editorial, curated, and European. Let's build it.*
