12 The Ask 25

13 Closing 26

"People who want to age well are forced to become full-time project managers of their own health."

In an environment of infinite wellness options, trusted curation becomes more valuable than product proliferation. Longevity is no longer inaccessible. It is overwhelming. Consumers are not struggling to find options. They are struggling to decide what is worth trusting, combining, and repeating.

The problem is not lack of supply.

It is lack of intelligent, taste-driven curation developed in consultation with medical professionals.

[01] THE INSIGHT

What is broken about how people engage with longevity?

01 Discovery
Hears about longevity from a podcast, book, or friend. Excitement peaks.

02 Research
Finds 300,000+ supplement SKUs, contradictory protocols, influencer advice. Overwhelm begins.

03 Scattered Purchases
Buys from 4 to 6 different brands. Downloads 2 to 3 apps. No connection between them.

04 Self-Curation
Attempts to build their own stack. Spends EUR 150 to 400/mo across fragmented services.

05 Decision Fatigue
Cannot evaluate quality, dosage, interactions, or timing. Guilt replaces excitement.

06 Abandonment
Gives up within 60 days. Returns to old habits. 96% digital health app churn rate.

66
DAYS

66 days to form a health habit. 96% of users churn before they get there. The window between initial motivation and lasting behavior change is where nearly every wellness product fails.

Lally et al. (2010), European Journal of Social Psychology; Baumel et al. (2019), Journal of Medical Internet Research; RevenueCat State of Subscription Apps (2025).

[01] THE INSIGHT

Why **now**?

Three forces have converged to create a once-in-a-decade entry point.

Force 1: Demand exploded. Infrastructure did not.

- Peter Attia's **Outlive**: #1 NYT bestseller, sold 3M+ copies globally
- Andrew Huberman: **10M+ followers** across platforms
- Bryan Johnson: made anti-aging cultural, mainstream media coverage worldwide
- Euromonitor 2025: healthspan ranked **#1 global consumer trend**
- **84% of consumers** now rank wellness as a top priority (GWI 2024)

"Consumer awareness has outpaced every product category built to serve it."

Force 2: Germany's prevention gap is an open market.

- **EUR 474B** spent on healthcare annually (12.3% of GDP)
- Only **3.1%** allocated to prevention
- 7.8 hospital beds per 1,000 population (OECD average: 4.2)
- **62% of Germans** say the system focuses too much on treatment

"The gap is not a policy debate. It is an open market."

Force 3: Technology is ready. No company has integrated it.

- **CGM sensors:** real-time metabolic tracking, consumer-grade
- **AI:** personalized protocol generation at scale
- **Wearables:** sleep, HRV, stress monitoring (validated accuracy)
- **Red light therapy:** clinically validated, growing adoption
- **Functional nutrition:** proven category, fragmented delivery

"No company has integrated a physical space, a proprietary app, a scalable product brand, curated retail, and cultural event programming into one data-enabled business model."

[01] THE INSIGHT

Who is **left out**?

SERVED (NICHE)

Clinical Biohackers

- Build their own complex stacks
- Technical, intimidating
- Requires extensive self-education

UNSERVED

The Missing Consumer

- Fewer options, better selected
- Integrated rituals, not scattered products
- Authority without medical intimidation
- Taste without pseudoscience
- Has purchasing power, aesthetic sensitivity, high LTV

"No ecosystem built for them."

SERVED (MASS)

Mass-Market Consumers

- Buy trend-driven products
- No structure or integration
- Short-lived experimentation

41%	68%
18 TO 45 AGE GROUP SHARE OF TOTAL WELLNESS SPEND	18 TO 35 PKV HOLDERS WILLING TO PAY OOP FOR PREVENTIVE HEALTH

SHARED CHARACTERISTICS ACROSS ALL SEGMENTS

Value experience over products. Willing to pay premium for quality. Already spend on fragmented wellness. Digital-native, expect app integration. Respond to community and culture.

Is this a vitamin or a painkiller?

This is a painkiller.

EUR 8.9-21.1K	96%	62%
SPENT PER USER/YEAR ON FRAGMENTED ALTERNATIVES	DIGITAL HEALTH APP CHURN RATE BEFORE 66-DAY HABIT THRESHOLD	OF GERMANS SAY HEALTHCARE SYSTEM FAILS AT PREVENTION

alche is a painkiller for a population hemorrhaging time, money, and motivation on wellness fragmentation. The pain is measurable. The market is quantifiable. The timing window is **18 to 24 months** before US players localize to DACH.

Sources: Euromonitor International (2025); OECD Health at a Glance (2023); Destatis (2023); RevenueCat (2025); Lally et al. (2010); Baumel et al. (2019); Global Wellness Institute (2024).

[02] WHO WE SERVE

Longevity for people who actually live.

Not the 1% who cold-plunge at 5 AM. The millions who care about aging well but have been given fragmented tools that deliver data without direction.

PRIMARY PERSONA

Mira

34 / Berlin / Product Designer / EUR 72,000

Runs three times a week. Takes magnesium and vitamin D but is not confident about dosing. Wore an Oura ring for five months, checked her sleep score every morning until it started **giving her anxiety about not sleeping well enough**. The ring is on her nightstand.

Tried Levels for two months. Learned bananas spike her glucose. Thought "...now what?" and cancelled. Has a supplement shelf with six half-empty bottles. She does not want to optimize. She wants to **live fully and age well without it becoming her second job**.

ACROSS 6-8 PROVIDERS

→

€49-99
PER MONTH, INTEGRATED
ONE PLATFORM

We are not creating new health spending. We are consolidating fragmented budgets into a single integrated relationship, at a lower price point with better outcomes.

WHY BERLIN

The ecosystem is forming here.

Berlin has the highest concentration of health-conscious expats in DACH, a 15-20% English-speaking population matching alche's content language, and lower operational costs that extend runway. The Biohackers Berlin Meetup alone has 2,213 members.

800K	15-20%	2,213
RESIDENTS AGED 25-45	ENGLISH-SPEAKING POPULATION	BIOHACKERS BERLIN MEETUP MEMBERS

MARKET VALIDATION

27% of Germans are willing to pay out-of-pocket for health apps (SpringerMedizin). Berlin tech worker median salary: **EUR 75,000 gross** (GfK). The purchasing power and willingness to pay for curated health experiences are already proven in this market.

SpringerMedizin 2024 / GfK Purchasing Power Study 2024 / Biohackers Berlin Meetup / Berlin Partner / DSSV 2024

[03] THE MARKET

The European longevity market is forming now.

No integrated player exists. That changes within 12-18 months.

THE GERMAN HEALTH PARADOX

Germany spends nearly **EUR 495 billion** on healthcare annually (12.3% of GDP), the highest in the EU. Only **4.8%** goes to prevention. With 7.7 hospital beds per 1,000 people (OECD average: 4.2), the system was architecturally built to treat illness, not prevent it. Consumers are filling the gap themselves.

COUNTRY	HEALTH SPEND (% GDP)	LIFE EXPECTANCY	GAP
Germany	12.3%	81.1 yrs	#1 spend, below 5 cheaper systems
Switzerland	11.3%	83.4 yrs	+2.3 yrs, spends less
France	12.1%	82.2 yrs	+1.1 yrs, spends less
Japan	11.5%	84.5 yrs	+3.4 yrs, spends less
OECD avg	9.3%	80.3 yrs	

OECD Health at a Glance 2025 / Destatis 2023 / GWI 2024 Global Wellness Economy Monitor

MARKET SIZING

TAM / SAM / SOM

TAM $6.3T Global wellness economy (GWI 2024). Context marker, not a revenue claim.

SAM €3.2-4.1B

Germany. Supplements (€2.67B), functional beverages (€2.8-3.2B), digital health apps (€263M), premium wellness (€300-500M).

SOM 145 subscribers to break even

From 108K Mitte residents aged 30-44. Conservative: 300 members Y1. Base case: 600. alche consolidates existing spend.

~108K	250-280K	~400K
MITTE 30-44 YR OLDS	HIGH-INCOME HOUSEHOLDS (>€4,500 NET/MO)	PKV HOLDERS IN BERLIN (PREVENTION COVERAGE)

EUROPEAN ADVANTAGE

Not behind, structurally different.

Insurance covers prevention

PKV (8.73M holders) reimburses €200-500/yr in wellness. US consumers pay 100% out-of-pocket.

Centuries of Kur culture

European wellness built on apothecary traditions. alche speaks to that lineage, not Silicon Valley imports.

GDPR as trust differentiator

Only 8% of EU consumers share health data. A GDPR-native platform is a feature, not a compliance cost.

Lower pricing works here

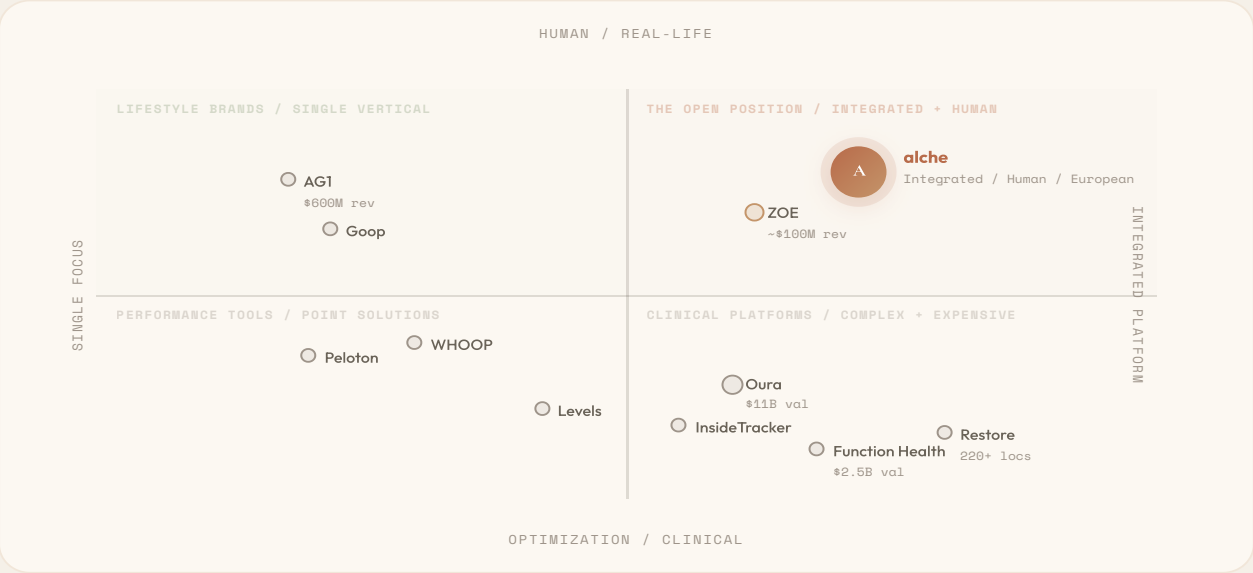
€19-99/mo matches European norms. US players at $199/mo will feel overpriced.

GWI 2024 / Statista 2024 / Euromonitor 2024 / PKV-Verband 2024 / BEUC 2024 / DSSV 2024 / Berlin Partner

[04] COMPETITIVE LANDSCAPE

We mapped the terrain.

30+ companies analyzed. The integrated European longevity platform does not exist yet.



COMPANY	POSITION	SCALE	GAP
Oura	Wearable ring. 5.5M sold, 2M subscribers. Acquired Veri (CGM).	$11B	No lifestyle layer
Hims	Telehealth + DTC. Distribution-first, not community-led.	$2.3B rev	No integration of a physical space, a proprietary app, a product brand, curated retail, and cultural events into one data-enabled business model
ZOE	Nutrition AI. Science + warmth. UK-based, nutrition-only.	~$100M rev	Single vertical
AG1	Content-first supplements. $600M revenue, profitable.	$600M rev	No data layer

Oura tells you your sleep score. It does not help you fix it. Each competitor does a piece. No integration of a physical space, a proprietary app, a product brand, curated retail, and cultural events into one data-enabled business model, especially in Europe.

> *"We studied $1.4B in failures so we could build differently."*

WHAT $1.4B TAUGHT US

Seven companies with better funding than us made specific, identifiable, avoidable mistakes. Three survivor patterns emerged:

01, ASSET-LIGHT

ZOE, AG1, and Levels survived by curating and connecting, not owning the value chain. Forward built $1M hardware pods and collapsed after burning $657M.

02, CONTENT-LED

AG1 built a $600M business on content and community, not clinical infrastructure. ZOE grew on Tim Spector's authority. Science is necessary but not sufficient, distribution wins.

03, COMMUNITY-FIRST

When GLP-1 drugs arrived, companies without community had no reason for users to stay. Social fabric is the only retention moat that survives technology disruption.

THE WINDOW

12-18 months before well-funded incumbents integrate European longevity protocols.

Oura has not localized beyond hardware retail. Hims EU expansion is nascent. Levels and Function Health are US-only. Neko Health (Spotify founder) focuses on scanning, not integrated wellness. The full-stack European longevity platform is wide open.

$8.49B	30+	0	12-18

[05] THE SOLUTION

One ecosystem. Four pillars.

Physical Space

- LED red light therapy
- Functional smoothie bar (six signature potions)
- Own-brand blends and capsule products
- Curated third-party supplements
- Walk-in to member conversion engine

Product Brand

- Own-brand blends and capsules
- Curated third-party supplements
- Outcome-organized catalog

App and Membership Platform

- Booking, tracking, commerce, community
- AI concierge and personalized protocols
- Biomarker dashboard and digital twin

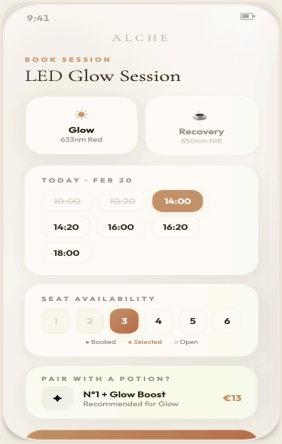
Events and Culture

- Wellness events and science talks
- Community circles and challenges
- Cultural authority through curation

> *Every pillar generates data. Every data point feeds the system. Every cycle makes the next one smarter.*

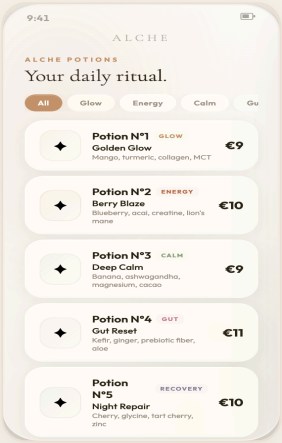
THE PHYSICAL JOURNEY

Book. Arrive. Experience.



Book

LED session and smoothie, pre-ordered in the app



Customize

Six potions (EUR 7 to 11), five boosts (+EUR 2)

Experience

20 minutes of LED therapy with a functional smoothie

SMOOTHIE BAR

N°1 The Radiance Potion: Mango, passion fruit, banana, coconut milk, vanilla

N°2 The Clarity Potion: Ceremonial matcha, banana, oat milk, honey, spinach

N°3 The Stillness Potion: Raw cacao, banana, almond butter, oat milk, cinnamon, date

N°4 The Repair Potion: Pineapple, fresh turmeric, fresh ginger, coconut water, banana, black pepper

N°5 The Balance Potion: Acai, blueberry, banana, coconut yogurt, apple

N°6 The Clean Potion: Young coconut, coconut water, banana, lime, vanilla, sea salt

FUNCTIONAL BOOSTS

Collagen peptides

Lion's mane extract

Ashwagandha KSM-66

MCT oil powder

Vitamin D3 + K2

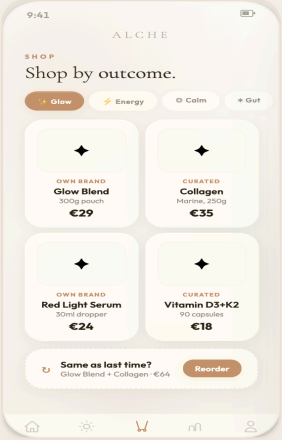
LED THERAPY

Glow (630-660nm): skin health, collagen synthesis, circulation

Recovery (810-850nm): deep tissue repair, inflammation, muscle recovery

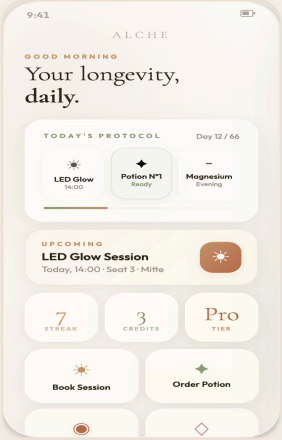
THE DIGITAL LOOP

Browse. Track. Return.



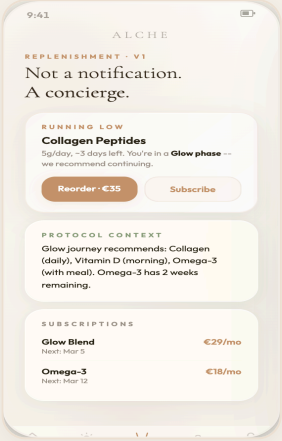
Browse

Products organized by outcome, not ingredient



Track

Dashboard shows journey progress and wellness scores

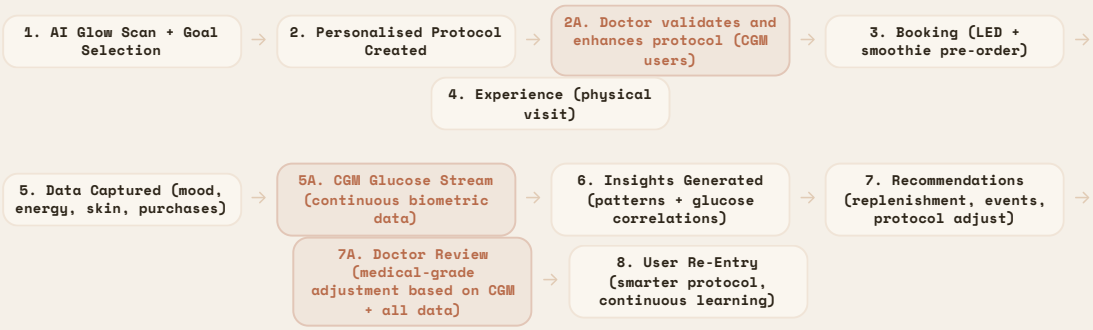


Return

Smart replenishment reminds and reorders automatically

THE DATA FEEDBACK LOOP

The entire system is built around a feedback loop that connects physical and digital layers. This is the core contribution: a continuous data-driven feedback loop.



The doctor does not slow down the loop. Steps 2A and 7A operate asynchronously. The user continues through the loop without interruption while the doctor reviews data and refines the protocol in the background. When an update is ready, the user receives a notification: "Dr. Jarmoukli has updated your protocol. View your new wellness plan." This architecture transforms alche from a simple wellness app into a medical-grade wellness intelligence platform.

WHAT YOU CAN BUY

The Product Shelf

Own-brand blends

300g pouches, 5 varieties. Matched to outcome categories.

Single ingredients

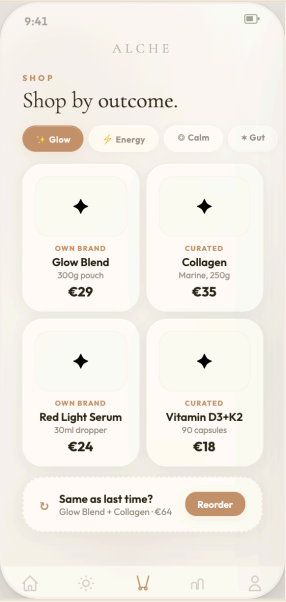
Collagen, matcha, spirulina, lion's mane, ashwagandha.

Capsules

Omega-3, NAC, CoQ10, NR, probiotics, glutathione.

Curated third-party products

Vetted supplements and functional tools from partner brands.



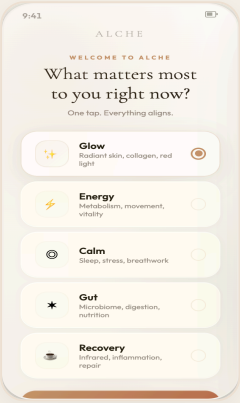
OUTCOME CATEGORIES

GLOW | ENERGY | CALM | SLEEP | RECOVERY | ANTI-INFLAMMATORY

Products are organized by what you want to achieve, not by ingredient name. Every item maps to at least one outcome. The app recommends products based on user goals, session history, and biomarker data.

[06] THE PRODUCT

The App. 10 Modules.



ONBOARDING

PRODUCT ROADMAP

From commerce loop to full platform.

MVP ships the transaction engine. Intelligence layers arrive when we have enough behavioral data to make personalization meaningful.

MVP: MONTHS 1 TO 4

Commerce Loop

- LED session booking
- Smoothie menu and ordering
- Outcome-based product shop
- Membership tiers
- Event calendar and RSVP
- Basic wellness dashboard
- User profiles and history

V1: MONTHS 5 TO 9

Intelligence Layer

- AI concierge
- Smart replenishment
- CGM integration (basic)
- Glucose-smoothie correlation
- Curated protocol engine
- Wearable data sync

V2: MONTHS 10+

Full Platform

- Biomarker dashboard
- Biological age score
- Digital twin model
- Personalized AI protocols
- Doctor integration
- Advanced CGM analytics

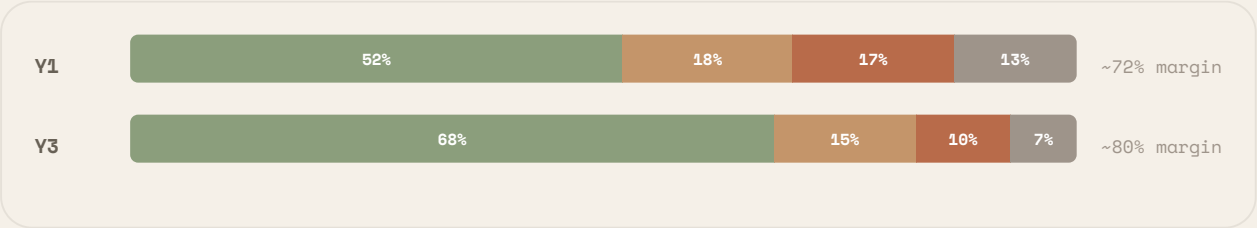
WEIGHTED ARPU	LTV : CAC (CONSERVATIVE) UP TO 15X REALISTIC	BREAK-EVEN 145 PAYING USERS	BLENDED MARGIN Y1 → 80% BY Y3	RAISE TARGET

PRICING

TIER	MONTHLY	VALUE PROPOSITION	GROSS MARGIN
Free	€0	Content, community access, product browsing	,
Core	**€19**	Biomarker dashboard, wearable sync, basic protocols	85-90%
Pro	**€49**	Personalized protocols, AI insights, advanced tracking	85-90%
Premium	**€99**	Blood panel credits, 1:1 reviews, exclusive events, CGM (Phase 2)	70-85%

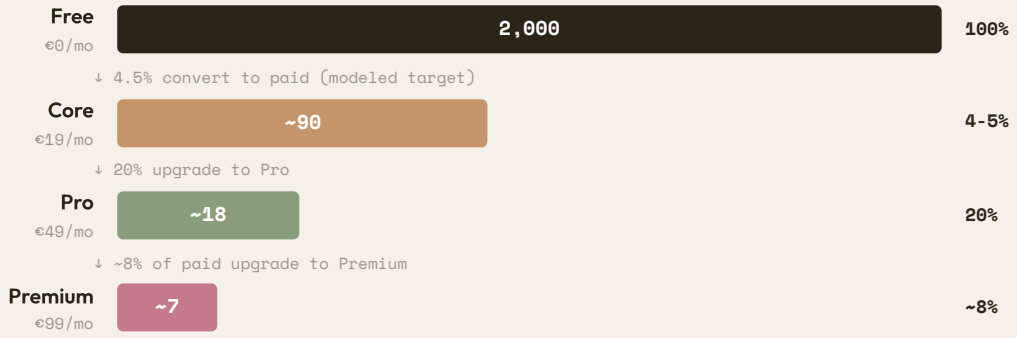
REVENUE COMPOSITION

Subscription share grows from ~52% to ~68%, shifting valuation toward SaaS-adjacent multiples (8-15x ARR) vs. premium retail (2-4x revenue).



CONVERSION

Subscriber funnel at Month 12



+ Direct-to-paid from physical space: est. 30-40 subscribers (modeled target)

Total M12: ~145 paying

UNIT ECONOMICS

CONSERVATIVE

5.1x

€35 ARPU x 8-month lifetime
LTV €280 / CAC €55

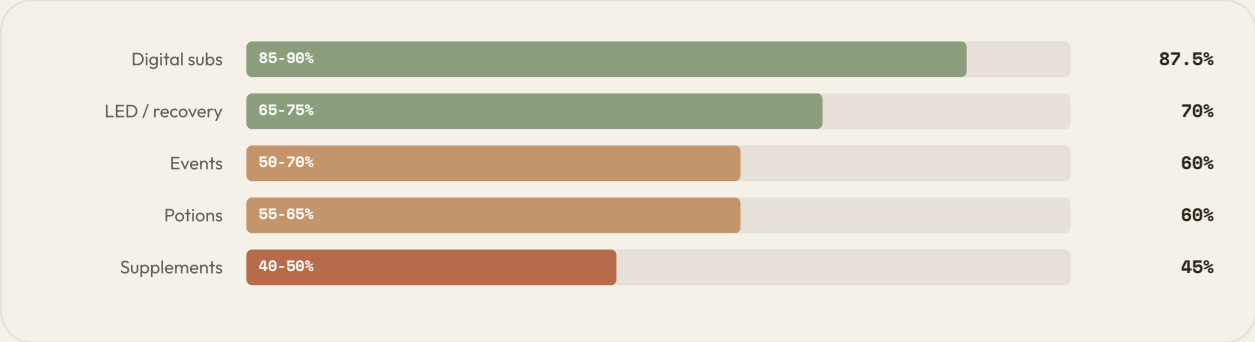
REALISTIC

14.7x

€49 ARPU x 12-month lifetime
LTV €588 / CAC €40

MARGINS

Gross margin by revenue stream



PATH TO BREAK-EVEN

LAUNCH	BREAK-EVEN	BUFFER AT BREAK-EVEN
M4	M12	€142K
	145 paying + €10K/mo space	

24-month runway with €500K raise. Pre-launch burn: €7,600/month. Break-even achieved through a combination of ~145 paying digital subscribers and ~€10,000/month in physical space revenue (products, services, events). Even at €400K raise, the model reaches break-even with a €42K buffer.

RevenueCat 2025 State of Subscription Apps / Industry churn benchmarks (Recurly, Baremetrics) / DSSV 2024 / Stripe Payment Infrastructure

[08] GO-TO-MARKET

Build the audience before the product.

Content-first. Community-first. The product comes to people who already trust the voice.

Most startups spend money to find customers. We find customers for free, then spend money to build what they already want. Our content-first strategy trades founder labor for capital: every video, newsletter, and community event builds an audience that converts directly into our waitlist, then our founding members, then our recurring revenue.

TWO FLYWHEELS, SEQUENCED

FLYWHEEL 1, RUNNING NOW

The Content Engine

Create radical-honesty science content → attract health-curious audience → they engage and share → we learn what they need → create sharper content. No product needed. No funding needed.

FLYWHEEL 2, ACTIVATED BY FUNDING

The Product Engine

Know your body (data) → Do the protocols (action) → Get what you need (products) → Belong with others (community). Funding builds the product for an audience that already exists and trusts us.

CHANNEL STRATEGY

PRIMARY: SHORT-FORM VIDEO

TikTok + Instagram Reels, @alche.space

Radical honesty science content. 3-5 posts per week. Pattern-breaking format: first piece is a collagen deep dive across 23 studies showing only industry-funded research is positive. This IS the brand voice.

SECONDARY: NEWSLETTER

Weekly email, Substack or Beehiiv

One deep dive per week. Captures emails, the only owned asset. Social algorithms change; email lists compound. Where the most engaged followers live and conversion happens.

AMPLIFIER: YOUTUBE

Monthly "Alche Reviewed" long-form

10-20 minute deep research episodes. Evergreen SEO pillars that rank in search for years, the moat no short-form competitor builds.

AMPLIFIER: BERLIN EVENTS

Quarterly "Alche Salon", EUR 200-500/event

Science talks over wine at existing Berlin venues. One evening generates a month of content. Doubles as customer discovery. Biohackers Berlin meetup (2,213 members) is the warm audience.

EXECUTION ROADMAP

12 months to product-market fit.

Q1 M1-3

Foundation

PRE-FUNDING // EUR 0 BUDGET // CONTENT ENGINE IGNITION

- Launch @alche.space. 3-5 short-form videos per week, honest science format.
- Launch newsletter (Week 2). Goal: 300 subscribers by end of Q1.
- 10 informal customer discovery conversations from social DMs and meetup contacts.

Q2 M4-6

Traction Proof

PRE-FUNDING // EUR 200-500 EVENTS // WAITLIST OPENS

- First Alche Salon event. 30-40 people. Film everything, one event produces 3-4 weeks of content.
- Open waitlist landing page. Goal: 500 signups from newsletter + social + events.
- Begin GmbH formation. Apply to GruendungsBONUS Plus (EUR 50K non-dilutive Berlin grant).

Q3 M7-9

Fundraise + Build

FUNDING CLOSES // EUR 500K RAISE // MVP DEVELOPMENT BEGINS

- Pitch with real numbers: followers, newsletter subs, waitlist, event attendees.
- Post-funding: hire technical co-founder / dev lead. Begin MVP development.
- Events scale to monthly with 60-80 attendees.

Q4 M10-12

Beta Launch

POST-FUNDING // PRODUCT IN HANDS // FOUNDING MEMBERS

- MVP beta to first 50-100 users from waitlist. Founding member pricing: EUR 19/month, locked for life.
- Content evolves to include product teasers, beta user stories, "building in public" updates.
- Physical space search begins. Berlin location planning for hybrid model proof.

TARGET METRICS BY QUARTER

	Q1	Q2	Q3	Q4
Social followers	1-2K	3-5K	8-12K	15-20K
Newsletter subs	300	1,000	2,500	5,000
Waitlist signups	--	500	1,500	(converts)
Event attendees	--	35	250	500+
Paying users	--	--	--	**50-100**
Content CAC	**€0***	**€0***	**€0***	**€0***

*EUR 0 paid acquisition. Content cost is founder labor, not capital.

[09] TRACTION

9 conversations that changed our product.
3 hypotheses we killed.

No product yet. What we bring: proof of market understanding, intellectual honesty, and a 90-day plan to generate the data that matters.

$8.9-21.1K	711K+	18-24 mo
SPENT PER USER/YR ON FRAGMENTED ALTERNATIVES[1]	SUBSCRIBERS ACROSS R/BIOHACKERS, R/LONGEVITY, R/SUPPLEMENTS[2]	WINDOW BEFORE US PLAYERS LOCALIZE TO DACH[3]

CUSTOMER DISCOVERY , 9 INTERVIEWS

Health-conscious professionals in Berlin, 28-45, 60-min open-ended sessions.

01
"Longevity with intention" tested strongest. Interviewees rejected both "biohacker" and "anti-perfectionist" labels.

02
Fragmentation creates guilt, not just inconvenience. People feel like they're failing at wellness because the ecosystem is impossible to navigate.

03
Accountability without judgment. Small consistent groups over leaderboards. Gamification does not work for longevity.

04
Already spending EUR 50-200/mo on fragmented services , willing to consolidate. Non-spenders need a trigger event (content-first GTM).

05
Local community events as entry point got the strongest positive signal of anything tested.

WHAT CHANGED BASED ON INTERVIEWS

Positioning: "longevity with intention" replaced "anti-perfectionist." **Community:** small accountability circles, not open forums. **Entry point:** content + local events first, app second.

[1] Alche competitive spend analysis, Feb 2026 / [2] Reddit subscriber counts, Feb 2026 / [3] Competitive intelligence; no US player has announced DACH expansion

VALIDATED

- Market demand (711K+ community, $8.9-21K/yr fragmented spend)
- Positioning thesis (3 research cycles + 9 interviews)
- "Longevity with intention" language (emerged from interviews)
- Competitive white space (10+ competitors, none integrated)
- Berlin as launch market (ecosystem + timing window)
- GTM sequence: content, events, app
- Medical advisor secured

WHAT FUNDING SOLVES

- Product-market fit (build MVP, test with real users)
- Conversion data (waitlist → signup → paid)
- Retention and engagement metrics
- Unit economics in practice
- Technical build (CTO hire, dev team)
- Physical space proof-of-concept

HYPOTHESES INVALIDATED

~~"Anti-perfectionist" is the right language~~
Killed by interviews. Reactive, confusing. "Longevity with intention" emerged from users' own words.

~~Physical space first, digital second~~
Killed by Berlin failure patterns. Capital-intensive physical retail fails. Model flipped: digital-first.

~~Bootstrap as a lifestyle business~~
Killed by competitive timing. 18-24 month window. Speed to market matters more than capital efficiency.

90-DAY TRACTION ROADMAP

DAY 1-30

Foundation

GmbH formed. 20 interviews complete. Waitlist live. CTO search launched.

DAY 30-60

Traction

Content channel at 1,000+ followers. First Berlin event (50+ attendees). Medical advisor formalized.

DAY 60-90

Momentum

MVP spec finalized, development underway. Community pilot with founding members. Measurable KPIs: waitlist conversion, event attendance, content engagement.

[10] THE MOAT

We do not claim a moat. We have a thesis about what compounds.

At pre-seed, no moat exists yet. What investors evaluate is whether the model has the structural potential to build one.

PHASE 1 // MONTH 0-12

Social Identity

"Being in my Alche era" becomes part of how people talk about themselves. Brand, content, and the physical Berlin space build identity. People do not leave brands they identify with, this is structural, not aspirational.

Taste-dependent. Hardest to copy.

PHASE 2 // MONTH 6-18

Network Effects

As community grows, each new member increases value for existing members. Accountability groups, shared challenges, event networks, protocol sharing. The value of being in the community increases with its size.

Time-dependent. Impossible to fast-track.

PHASE 3 // MONTH 12+

Switching Costs

12 months of biomarker data, personalized protocols, supplement subscriptions, and community connections create real friction to leave. GDPR means data is portable, but insights, calibrated protocols, and social graphs are not.

Volume-dependent. Gets more valuable.

WHAT AI CANNOT REPLACE

If Apple Health + ChatGPT gives personalized longevity advice for free, the pure data-and-insights layer is commoditized. What survives: **physical experiences** (AI cannot give you a smoothie or a community event), **social identity and belonging** (people join for community, not because the algorithm is optimal), **accountability and motivation** (knowing what to do is not the hard part, doing it consistently is).

INTEGRATION IS THE THESIS

None of alche's competitors combine biomarker data + personalized protocols + curated products + physical experiences + community in one platform. They each do one or two layers. Integration is structurally hard to bolt on because it requires different organizational DNA than single-vertical excellence. GDPR-native data trust gives a European entrant a structural advantage US platforms cannot retrofit. When the data layer gets cheaper and AI interpretation improves, the companies that built genuine community, cultural identity, and regulatory trust are the ones still standing.

Competitive analysis: 30+ companies, Feb 2026 / Blue Zones / WHOOP 2025 Retention Data / Fortune Business Insights 2025

[11] THE TEAM

The Team

Timur Tasdogan

CO-FOUNDER AND CMO, 49% EQUITY

- MSc Data Science (GISMA Berlin), BA Economics (Koc University)
- Concentrix / Meta: EUR 1.8M ad spend, ROAS 1.5x to 2.7x
- Hepsiburada (NASDAQ: HEPS): EUR 300K budget, 4x ROAS
- Quantpaper founding team, 27% activation lift

Daria Dijan Roth

CO-FOUNDER AND COO, 51% EQUITY

- BSc Computer Engineering + BA International Business
- Backend development (Jan Iletisim Teknolojileri)
- Brand positioning (MUTA-1 Reklamcilik)
- Domain expert: 4-year autoimmune journey

AmirFarzam Kamalpour

TECHNICAL LEAD

- Self-taught developer since age 12
- Runs Star Digital (stardigital.ir): IT infrastructure, hosting, web and app development
- Previously at Jung von Matt HAVEL (Berlin): IT and web development
- Brings existing server infrastructure to the alche build

MEDICAL ADVISOR

Shukri Jarmoukli

PHYSICIAN, FUNCTIONAL MEDICINE

Medicine, Universitat zu Koln. Runs Lifestyledoctor, a self-pay longevity practice in Berlin. Functional medicine, psychoneuroimmunology (KPNI), and CGM biofeedback. His patients are alche's exact target demographic.

Role: protocol validation, medical content review, biomarker interpretation, regulatory compliance.

BREAK-EVEN	Month 12, 145 paying subscribers + EUR 10K/month space revenue
BUFFER AT M12	EUR 142,000 (at EUR 500K raise) // EUR 42,000 (at EUR 400K)
USE OF FUNDS	[Detailed allocation shared separately upon request]

WHAT EUR 500K UNLOCKS

Build

Technical co-founder hire. 16-week MVP development sprint. App architecture and biomarker integration. GmbH formation and legal structure.

Launch

Content production scaling. First Alche Salon events. Beta to 50-100 founding members. Community infrastructure.

Prove

Unit economics validation. Churn data vs. industry averages. Conversion funnel metrics. Physical space as acquisition channel proof.

THE INVESTOR EQUATION

Zero European competitors in integrated longevity lifestyle. A 12-18 month window before US players localize. EUR 500K buys 24 months of runway, break-even at Month 12 with a EUR 142K buffer, and a founding team that has already done the research

[13] CLOSING

The ambition.

Berlin is the proof. Europe is the unlock.

THE ENDGAME

The longevity lifestyle platform for all of Europe.

What Aesop did for skincare, took something technical and made it beautiful, accessible, and identity-forming. That is what alche does for longevity.

FROM HERE TO THERE

PHASE 1 // M0-12

Berlin proof of concept

App launch. One physical space in Mitte. 145 paying subscribers. Break-even on unit economics. Content flywheel spinning. Community density forming.

PHASE 2 // M6-18

Digital expansion across EU

Open app beyond Berlin. Ship products across the EU. Partner with existing wellness spaces. Prove digital-only members retain without a physical node.

PHASE 3 // M12-24

Second location + seed round

Second Berlin location where digital density is highest. Pop-ups before permanent. Seed round at EUR 2M+ MRR trajectory.

PHASE 4 // M18-36

Platform maturity

Open API for partner integrations. Corporate wellness tier. Expand category presence across EU.

> *"Longevity should not be solely for tech bros of Silicon Valley. It should be for everyone who wants to live better, not just longer."*
>
> Community sentiment, r/Biohackers, r/Longevity, r/Supplements // 711K+ members

What alche is not

Not a wellness brand that happens to have an app. Not a longevity clinic for the already-converted. Not another personalized nutrition play. Not a Silicon Valley export.

What alche is

The digital platform is the business. The physical space is one revenue module. Built in Berlin for European culture, regulation, and sensibility. GDPR-native from day one. An identity brand, not a feature set.

alche

Your longevity, daily.
