§ 07 · RESEARCH

Investors EU

Twenty-three pan-European funds. Calm/Storm, Goddess Gaia, Eka, Five Seasons at the top.

Purpose. Identify pan-EU or sub-region-specialist pre-seed VCs with explicit wellness / longevity / femtech / consumer-health theses who can write €150K–€500K into Alche's €500K pre-seed round.

Alche, in one line. Berlin-based "Xiaohongshu for longevity in Europe" — free AI longevity app that drives curated supplement commerce (3P today, own-brand later) with a thin €5–9/mo membership tier.

Comps investors will recognize. Xiaohongshu (content-to-commerce), AG1 (single-hero supplement), The Ordinary / DECIEM (ingredient-transparent retail), Thrive Market (curated wellness marketplace), Ritual (clinical consumer supplement), Costco (proof point of curation-with-loyalty).

Research date. April 2026. All funds verified active in 2025 or 2026 via Tracxn / CBInsights / Crunchbase / own-site signals.

Method & scoring rubric

Fit score (1–10) weighs: (a) explicit wellness / consumer-health thesis, (b) true pre-seed check appetite at €150K–€500K, (c) Europe-native mandate that fits a Berlin / solo founder, (d) portfolio adjacency without direct conflict, (e) retail / DTC / supplement literacy.

Red-flag conventions. Conflict = fund already backs a direct competitor (AG1, Ritual, Heights, Form, Exhale, Feel, Vitl, Equi, Oura, Whoop, Hims, Biocol). Stage risk = fund's real sweet spot is seed / Series A, not €500K pre-seed. Geography risk = mandate excludes Berlin / Germany.

The Fund Card Set (23 funds)

1. Calm/Storm Ventures — Vienna

- **URL.** https://www.calmstorm.vc
- **Pre-seed check (EUR).** €50K–€300K (their published range). Primary ticket size; can do a second check up to seed.
- **Thesis.** Digital health, femtech, mental health, sexual wellness, chronic conditions, prevention, infertility. Europe's #1 HealthTech investor by deal count since 2020.
- **Wellness / DTC fit.** Very high. Health+wellbeing is the *only* thesis. They explicitly back "taboo and overlooked" categories; longevity / prevention sits dead centre.
- **Key partners.** Daria Saharova (Founding Partner), Jonathan Nørtoft (Managing Partner), Lucanus Polagnoli (Founding Partner). ~53 "Supporting Partners" angel network.
- **Fund size.** Calm/Storm 2 closed at ~€30M in 2024. Actively deploying in 2026 (3 investments YTD including Oska Health and Circle Health).
- **Recent portfolio comps.** Oska Health (€11M, Feb 2026, AI chronic care), Circle Health (€9M, Feb 2026, AI preventive health), Holo, Foundation Health, Nuvo (femtech), Inne (fertility).
- **Intro vector.** Speedinvest partners (#1 pre-seed co-investor into Calm/Storm deals), Entrepreneur First founders, warm intros from founders in their taboo-wellness cluster. Cold is viable — they publish email openly.
- **Fit score. 10/10.** This is Alche's single best fit in Europe.
- **Red flags.** Check size at upper bound is €300K — they'd need a co-lead for the full €500K. No hard conflict (they back *digital* health more than supplement commerce). Worth confirming they don't have a stealth longevity position before pitching.
- **Preferred pitch language.** English.

---

2. Goddess Gaia Ventures (GGV) — London

- **URL.** https://www.ggventuresgroup.com
- **Pre-seed check (EUR).** £800K–£2M (~€950K–€2.35M). Too big for a €500K round as lead — but could absorb the *entire* round if thesis clicks. Pre-Series A positioning.

- **Thesis.** Europe's only dedicated women's health + performance platform. Five pillars: fertility, female cancers, wellness, chronic disease, femtech products/services. Fund II is AI-native women's health.
- **Wellness / DTC fit.** High for the female-health slice of longevity. Less of a fit if Alche stays gender-neutral; strong fit if there's a women-forward wedge (perimenopause / hormonal longevity).
- **Key partners.** Priya Oberoi (Founding GP). Advisory bench includes Oxford / NHS leadership.
- **Fund size.** Raising £100M fund currently. Fund I active.
- **Recent portfolio comps.** Biorithm (foetal wearable), &Sisters (period care, DTC), Anya (breastfeeding app), Holly Health (wellbeing coaching, NHS).
- **Intro vector.** London femtech operator network; Sifted / Maddyness coverage of Priya Oberoi.
- **Fit score. 7/10** (9/10 with women's-health wedge, 5/10 gender-neutral).
- **Red flags.** Check size exceeds round target — they'd want to be the whole round, which means ceding more equity and slowing close. Also "pre-Series A" language suggests they want more traction than a pre-seed app.
- **Preferred pitch language.** English.

---

3. Eutopia (ex Otium Brands) — Paris / New York

- **URL.** https://www.eutopia.vc
- **Pre-seed check (EUR).** €500K–€10M. At the €500K end only for highest-conviction pre-seed; sweet spot is seed (€1–3M).
- **Thesis.** Sustainable consumer startups "rethinking how we eat, sleep, dress, exercise and feel." Wellness, beauty, food, beverage, recreation, fashion. B Corp, mission-driven.
- **Wellness / DTC fit.** Extremely high on thesis. They've backed Oh My Cream! (clean skincare retail — the closest portfolio analog to Alche's curated-commerce model) and Feed. (functional nutrition) and Insentials (supplements/wellness).
- **Key partners.** Antoine Fine (Managing Partner, Co-founder — ex-Lazard PE, ex-Oh My Cream! operator, healthy-snack founder). Camille (Founding Partner, wellness + food focus).
- **Fund size.** €280M AUM across Eutopia I–III; €100M most recent fund.
- **Recent portfolio comps.** Oh My Cream!, Feed., Insentials, Tediber, Moderato (NA wine), SPRiNG (detergents), Sheep Inc., Monday Sports Club, Même Cosmetics, Merci Handy.
- **Intro vector.** Antoine Fine is Timu's highest-leverage Paris contact — his Oh My Cream! operator past makes him literate on curated-commerce. Reach via LinkedIn or through Otium Capital / Kima alumni network.
- **Fit score. 9/10.** If thesis read matches, this is a co-lead candidate with Calm/Storm.
- **Red flags.** Insentials is a supplement/health brand — check for conflict before pitching (probably complementary not competitive). Check size lower-bound is €500K, so they'd eat the whole round.
- **Preferred pitch language.** French or English (both fluent). French shows effort.

---

4. Five Seasons Ventures — Paris (+ London presence)

- **URL.** https://www.fiveseasons.vc
- **Pre-seed check (EUR).** €2–10M. **Not a pre-seed fit for €500K round** — Series A / B fund. Including for relationship-build and Series A runway.
- **Thesis.** Pan-European consumer brands VC specialising in food-tech and functional nutrition "for a healthier, more efficient, more sustainable system."
- **Wellness / DTC fit.** Extremely high thematically. Explicit supplement + wellness exposure.
- **Key partners.** Ivan Farneti (Partner, Co-founder), Niccolo Manzoni (Partner).
- **Fund size.** Fund II €180M (2021). Fund III in market rumours 2025.
- **Recent portfolio comps. her1** (female wellness probiotics — DIRECT supplement DTC), **Spacegoods** (mushroom functional drinks, DTC), **ARTAH Nutrition** (£2.85M, Oct 2024 — functional supplements UK), **Puresport** (functional beverages), KoRo (snack DTC, €35M Series C Nov 2024), Butternut Box, Cortilia.
- **Intro vector.** Warm intro via Spacegoods / her1 / ARTAH founders — all Alche-adjacent brands that would recognize the play.
- **Fit score. 8/10 for Series A** — keep on list but do not waste pre-seed ammo. Build relationship now.
- **Red flags. Conflict risk.** her1 and ARTAH are DTC supplement brands; Spacegoods is functional consumption. Five Seasons may see Alche as overlapping with existing portfolio. Reframe Alche as the *platform / discovery layer* above their brands to avoid conflict.
- **Preferred pitch language.** English.

5. Shilling Founders Fund — Lisbon

- **URL.** https://www.shilling.vc
- **Pre-seed check (EUR).** €150K–€1M pre-seed; sweet spot stated as "first call to money in 30 days." Founder-friendly terms, profit-sharing with portfolio.
- **Thesis.** B2B + consumer across Iberia with international ambition. Openly generalist; "all categories."
- **Wellness / DTC fit.** Moderate-to-high. They backed **Biocol Labs** — a DTC post-chemical pharmacy which IS directly analogous to Alche's supplement curation play.
- **Key partners.** Hugo Gonçalves Pereira (Founder), Pedro Santos Vieira (Partner). 10 partners; founder-LP model (Atomico is sole institutional LP).
- **Fund size.** €30M Founders Fund + €50M Opportunity Fund (2024).
- **Recent portfolio comps.** Biocol Labs (DTC supplement/pharmacy — **DIRECT COMP/CONFLICT**), Sword Health, Unbabel, Rows, Promptly (health outcomes SaaS), Nook, Tucuvi (AI health, Series A Jan 2026).
- **Intro vector.** Atomico relationship if available; Lisbon founder network (Hugo is accessible).
- **Fit score. 6/10.** Would be 9/10 without Biocol — ask upfront whether Biocol status blocks a wellness-commerce play.
- **Red flags. Biocol Labs conflict is a hard red flag.** Must be cleared in first call. If Biocol has evolved into pure medical/pharmacy and not longevity supplements, it may be fine.
- **Preferred pitch language.** English.

---

6. Indico Capital Partners — Lisbon

- **URL.** https://www.indicocapital.com
- **Pre-seed check (EUR).** €100K–€1M pre-seed (stated range on their own "Get Investment" page). Up to €10M across life of a company.
- **Thesis.** SaaS, AI, DeepTech, SpaceTech, **HealthTech**, OceanTech, FinTech, **Consumer**. Southern Europe focus (Portugal, Spain, Italy).
- **Wellness / DTC fit.** Healthtech + consumer are named pillars, so in-scope, but not wellness-specialist.
- **Key partners.** Stephan Morais (General Partner — ex-Caixa Capital, highly-respected in PT/ES), Ricardo Torgal (GP).
- **Fund size.** €225M AUM across 3 funds. Fund III backed by EIF (€30M anchor).
- **Recent portfolio comps.** Remote (unicorn), Anchorage Digital, Unbabel (exit 2025), PandaDoc (Dec 2025). Less wellness exposure in recent portfolio.
- **Intro vector.** Stephan Morais is Lisbon's most warmly-connected GP — introduction through any Portuguese founder or EIF circle.
- **Fit score. 6/10.** Geographic mismatch (Berlin ≠ Southern Europe), but they explicitly invest in Germany-registered companies with PT/ES/IT relevance. Alche's Berlin base may be a "nice to have, not a must" — test early.
- **Red flags.** Geographic mandate tilt southward. Consumer isn't their loudest theme.
- **Preferred pitch language.** English (Portuguese a bonus for warmth).

---

7. Kibo Ventures — Madrid

- **URL.** https://www.kiboventures.com
- **Pre-seed check (EUR).** Typically €500K–€2M seed checks; pre-seed capability exists but less common. Sweet spot is Seed / Series A.
- **Thesis.** Pan-European tech, consumer-heavy. 24 of 79 portfolio companies are consumer. Technology differentiation + market-driven innovation.
- **Wellness / DTC fit.** Moderate — consumer is a core pillar but wellness is not the headline.
- **Key partners.** Aquilino Peña (Founder, Managing Partner), Juan López Santamaría (Partner), Noelia Fernández Brescia (Partner).
- **Fund size.** €500M+ AUM across 6 funds.
- **Recent portfolio comps.** Jobandtalent (unicorn), Sorare (unicorn), Devo, Minube. Consumer exposure is broader tech / marketplace rather than supplement / DTC.
- **Intro vector.** JME Ventures co-investors (5 shared companies), K Fund network.

- **Fit score. 5/10.** Generalist fund that occasionally touches wellness; not a natural fit for a €500K supplement-commerce pre-seed.
- **Red flags.** Stage drift (they prefer Seed €1M+), no wellness thesis.
- **Preferred pitch language.** Spanish or English.

---

8. Adara Ventures — Madrid

- **URL.** https://www.adara.vc
- **Pre-seed check (EUR).** €500K–€3M. **Strictly B2B deep-tech** per their own thesis.
- **Thesis.** B2B deep tech — cybersecurity, data, DevOps, AdTech, digital health (enterprise side).
- **Wellness / DTC fit. Very low / not a fit.** B2B-only mandate excludes consumer supplement DTC.
- **Key partners.** Alberto Gómez (Managing Partner), Nicolas Goulet (Managing Partner), Alberto Echeverri (Partner).
- **Fit score. 2/10.** Listed only to mark as NOT-FIT and avoid wasted cycles.
- **Red flags.** Wrong mandate entirely.
- **Preferred pitch language.** N/A.

---

9. Lakestar — Zurich

- **URL.** https://lakestar.com
- **Pre-seed check (EUR).** Historically pre-seed through growth; avg seed round ~$9.74M, so far too big for €500K lead. **2026 STRATEGIC SHIFT: Lakestar publicly stopped launching new generalist VC funds and is pivoting to DefenseTech + portfolio support.**
- **Thesis (pre-pivot).** Pan-European tech across fintech, consumer, deep tech, health. Neko Health (longevity-adjacent) is portfolio.
- **Wellness / DTC fit.** Neko Health is a direct longevity play — could be a co-investor ally, but likely sees Alche as below their new mandate.
- **Key partners.** Klaus Hommels (Founder).
- **Fit score. 3/10** for pre-seed in 2026. Keep on radar for Series A / B.
- **Red flags.** 2026 strategy pivot means they're unlikely to deploy fresh pre-seed capital. Neko Health is a portfolio longevity play — use as intro hook later, not a blocker.
- **Preferred pitch language.** English.

---

10. Creandum — Stockholm / Berlin / London / SF

- **URL.** https://creandum.com
- **Pre-seed check (EUR).** $200K–$10M published range; pre-seed is possible but sweet spot is Seed + Series A.
- **Thesis.** "Global category-defining companies" from Europe. Consumer internet, software, hardware. Portfolio hit-rate ~1 in 6 unicorns.
- **Wellness / DTC fit.** Moderate. KRY (digital health) and Depop (consumer) show they're willing.
- **Key partners.** Staffan Helgesson, Peter Specht (Berlin — Alche's closest partner), Carl Fritjofsson, Simon Schmincke.
- **Fund size.** ~€500M AUM.
- **Recent portfolio comps.** Spotify, Klarna, Bolt, iZettle, Lovable ($200M Series A July 2025), KRY (digital health), Depop.
- **Intro vector.** Peter Specht in Berlin is the right door. Warm intros through Berlin ecosystem (Klarna / Bolt alumni, N26 network).
- **Fit score. 5/10.** Tier-1 European VC, but €500K pre-seed is below their normal ticket. Build relationship for Seed.
- **Red flags.** Stage mismatch. They'll want to see traction before writing.
- **Preferred pitch language.** English.

---

11. Northzone — Stockholm / London / NY / Berlin / Amsterdam

- **URL.** https://northzone.com
- **Pre-seed check (EUR).** Multi-stage; Seed / Series A is sweet spot. €1B current vehicle — writing €500K would be unusual.

- **Thesis.** Seed-to-IPO multi-stage. Consumer is 57 of portfolio companies. Notable: Spring Health (mental wellness, US).
- **Wellness / DTC fit.** Spring Health suggests wellness willingness; no dedicated thesis.
- **Key partners.** Pär-Jörgen Pärson (Partner, Stockholm / NY), Sanna Blomkvist (Sustainability Lead, Stockholm).
- **Recent portfolio comps.** Spotify, Klarna, Trustpilot, iZettle, Hopin, Personio, Depop, Spring Health, Seamflow (Feb 2026).
- **Fit score. 4/10** for pre-seed. Save for Series A.
- **Red flags.** Stage mismatch.
- **Preferred pitch language.** English.

---

12. Byfounders — Copenhagen

- **URL.** https://www.byfounders.vc
- **Pre-seed check (EUR).** Leads Pre-seed and Seed; check size not publicly disclosed but typical is €500K–€1.5M for Nordic/Baltic pre-seed. They lead rounds.
- **Thesis.** "Community-powered VC of the New Nordics." Nordic + Baltic focus primary; will invest globally for exceptional founders.
- **Wellness / DTC fit.** Generalist. Uizard, Pixieray (wearables), Lovable in portfolio — no explicit wellness thesis.
- **Key partners.** Tommy Andersen, Eric Lagier, Henrik Kjellberg, Sara Rywe. 23 partners across Collective. 40+ operator Collective.
- **Fund size.** Fund III actively deploying.
- **Recent portfolio comps.** Contractbook, Lovable, Pixieray (smart glasses — consumer-health adjacent), Willo (€2.9M pre-seed Feb 2026).
- **Intro vector.** Warm intros welcome, open-door policy. Collective members are the strongest path.
- **Fit score. 5/10.** Berlin is outside primary geography — they'd need conviction.
- **Red flags.** Geography (Alche isn't Nordic). No wellness thesis.
- **Preferred pitch language.** English.

---

13. Inventure — Helsinki (+ Stockholm)

- **URL.** https://www.inventure.vc
- **Pre-seed check (EUR).** Primarily Seed and Series A. €230M AUM. Less a pre-seed fund.
- **Thesis.** Nordic + Baltic generalist. Deep tech, consumer, healthtech, AI, B2B SaaS.
- **Wellness / DTC fit.** Modest — consumer and healthtech exposure but not wellness specialist.
- **Key partners.** Sami Lampinen (Managing Partner), Lauri Kokkila, Aku Leijala, Timo Tirkkonen, Ida Sirkia.
- **Recent portfolio comps.** Wolt (exit), Swappie (consumer refurb), Insurello, Blueprint Genetics, Lassie (pet health/insurance — consumer-health adjacent).
- **Fit score. 4/10** at pre-seed. Nordic-geography mismatch + stage mismatch.
- **Red flags.** Germany not core geography. Seed-first mandate.
- **Preferred pitch language.** English.

---

14. Icebreaker.vc — Helsinki

- **URL.** https://www.icebreaker.vc
- **Pre-seed check (EUR).** Up to **€1.5M** as first institutional ticket (increased from historical €150K–€800K). **True pre-seed / idea-stage specialist.**
- **Thesis.** "First institutional investor" for domain-expert founding teams. SaaS, fintech, **healthtech**, AI/ML, consumer tech. Estonia, Finland, Sweden are primary; broader for exceptional founders.
- **Wellness / DTC fit.** Healthtech is a named pillar. Consumer tech is welcome. Less wellness-specialist than Calm/Storm.
- **Key partners.** Aleksi Partanen, Lasse Lehtinen, Riku Seppälä, Teddie Wardi (Founders). Team-of-partners model (multiple partners per portfolio).
- **Fund size.** Fund II €100M + €20M Opportunity Fund.
- **Recent portfolio comps.** Hoxhunt, Kodit.io, Klaus, Flowhaven, Aibidia. Portfolio 36% female-founder (above Euro average).
- **Intro vector.** Cold email works; Nordic founder intros are strongest.

- **Fit score. 7/10.** True pre-seed sizing, healthtech openness, founder-first — Berlin would require conviction but their "exceptional founders outside Nordics" flexibility helps.
- **Red flags.** Nordic-first geography; Berlin base needs justification.
- **Preferred pitch language.** English.

---

15. Kima Ventures — Paris (Xavier Niel's single-LP vehicle)

- **URL.** https://www.kimaventures.com
- **Pre-seed check (EUR). €150K standardized one-off ticket.** Any stage, any sector, 2 deals per week. Decision in ~30 minutes.
- **Thesis.** Founder-first, "most active angel in the world." Pre-seed through Series A+. All sectors including consumer, health.
- **Wellness / DTC fit.** Agnostic — Alan (digital health insurance, unicorn) and Ledger in portfolio show health/wellness openness.
- **Key partners.** Jean de La Rochebrochard (Managing Partner), Alexis Robert, Rodolphe Menegaux. Xavier Niel is the sole LP.
- **Fund size.** Evergreen single-LP structure, 1,357 cumulative investments.
- **Recent portfolio comps.** OpenClassrooms, Meero, Shine, Ledger, Alan (health), Plume (Seed, April 2026).
- **Intro vector.** Jean de La Rochebrochard is very accessible. Station F founders, French tech Twitter, any Paris founder. Decision is binary and fast.
- **Fit score. 9/10** as a check-completer. €150K at €5M cap fits Alche's €500K round perfectly alongside a lead. Low-drama partner.
- **Red flags.** They only invest once per company — no follow-on. Not a lead for a pre-seed round.
- **Preferred pitch language.** French or English.

---

16. Otium Capital — Paris (Pierre-Edouard Sterin family office)

- **URL.** https://www.otiumcapital.com
- **Pre-seed check (EUR).** €490K–€14M range; €100K–€15M per prior data. Bifurcated into Otium Venture (tech) and Otium Consumer (brands). Otium Consumer is Alche-adjacent.
- **Thesis.** Family-office investing own balance sheet (no LPs) across Venture, Industrial, Leisure, Real Estate. Otium Consumer targets Millennial/Gen-Z-facing brands.
- **Wellness / DTC fit.** Very high on consumer thesis. Dossier (fragrance DTC — exited at 50x April 2026), Adore Me (DTC apparel), The Fork.
- **Key partners.** François Durvye (CEO), Pierre-Edouard Sterin (Founder / sole capital source). 12 partners total.
- **Fund size.** €1.6B AUM, €255M deployed in 2024. Patient capital, no fund vintage pressure.
- **Recent portfolio comps.** PayFit (unicorn), Owkin (unicorn, health AI), Dossier (DTC fragrance, 50x exit April 2026), Adore Me, The Fork, Amenitiz, Fintool.
- **Intro vector.** Eutopia (which spun out of Otium Brands in 2019) is the natural warm-intro path — if Antoine Fine passes, he can re-route to Otium Consumer.
- **Fit score. 8/10.** DTC brand-builder literacy is elite. Check at lower-end fits €500K round.
- **Red flags.** Patient family-office capital means slow, thesis-heavy decision-making. Less urgency than a fund deploying vintage pressure.
- **Preferred pitch language.** French preferred.

---

17. Alven — Paris

- **URL.** https://alven.co
- **Pre-seed check (EUR).** Primarily Seed and Series A. Less a pre-seed specialist. Fund VI closed at €350M.
- **Thesis.** European tech. Named sectors include "consumer social & entertainment, B2C financial services and **wellness brands**."
- **Wellness / DTC fit.** Portfolio includes **WELLNESS BRANDS** as a named vertical: Birchbox, Feed., Joone, Sézane, Typology.
- **Key partners.** Jeremy Uzan, Charles Letourneur, Rodolphe Menegaux, Valery Huot, Hortense Fayolle.
- **Recent portfolio comps.** Typology (skincare DTC — highly relevant), Feed. (functional nutrition — relevant comp), Sézane (DTC fashion), Generare (drug discovery, Apr 2026), Symbiotic Security.
- **Intro vector.** Typology or Feed. founder introduction would be perfect. Kima co-investor network.

- **Fit score. 7/10.** Wellness-brand literate, but stage tilted higher than pre-seed. Worth pitching with a Seed bridge vision.
- **Red flags.** Feed. is a direct comp in the functional-nutrition space — check for conflict. Stage mismatch.
- **Preferred pitch language.** French or English.

---

18. Partech (Partech Partners) — Paris

- **URL.** https://partechpartners.com
- **Pre-seed check (EUR).** Partech Seed team active since 2013; checks from $300K. Multi-stage (Pre-Seed to Growth), $2.5B+ AUM.
- **Thesis.** Multi-geography (Paris, Berlin, Dakar, Dubai, Nairobi, SF). Consumer is 106 of 409 portfolio companies. Broad mandate including consumer, healthtech, marketplace.
- **Wellness / DTC fit.** Moderate — broad consumer exposure, no wellness-specialist thesis.
- **Key partners.** Philippe Collombel (Managing Partner, Paris), Reza Malekzadeh (Partner, Paris). Seed team: Bruno Crémel, Omri Benayoun.
- **Recent portfolio comps.** Rivage (Feb 2026 pre-seed €2.6M, payroll), Alpic (Sep 2025 pre-seed €5.1M), Modeinspect (Jan 2026 seed $3.4M).
- **Fit score. 5/10.** Big generalist with a pre-seed capability. Wellness is not a headline, but they write the ticket size.
- **Red flags.** Alche will compete for attention with 200+ other deals in their funnel. Need a Partech-native champion.
- **Preferred pitch language.** French or English.

---

19. Serena (Serena Capital) — Paris

- **URL.** https://www.serena.vc
- **Pre-seed check (EUR).** Fund IV closed €200M (target €250M) Oct 2025. Pre-Seed and Seed efforts run through **Racine²** (impact: environment, education, **well-being**) and Consumer Innovation sub-strategies.
- **Thesis.** Applied AI + Energy Transition on core fund. Racine² specifically includes well-being as a named pillar.
- **Wellness / DTC fit.** Racine² is directly relevant. Well-being is named. Need to confirm Racine²'s active deployment status.
- **Key partners.** Xavier Lorphelin, Marc Fournier, Philippe Hayat (Managing Partners). Olivier Martret (Impact), Margaux Gregoir, Stéphanie Nizard.
- **Recent activity.** 96 portfolio companies, 6 investments in last 12 months.
- **Fit score. 6/10.** The Racine² well-being angle is legitimate. Need to target Olivier Martret (impact partner) specifically.
- **Red flags.** Generalist fund; well-being is one of multiple impact sub-pillars, not the headline.
- **Preferred pitch language.** French preferred, English acceptable.

---

20. Daphni — Paris

- **URL.** https://www.daphni.com
- **Pre-seed check (EUR).** Seed to Series A primarily. Not a pre-seed specialist. Dastore fund with Carrefour targets early-stage commerce.
- **Thesis.** Positive societal/environmental impact. Daphni Blue fund (€260M, Jan 2026) is science/deep-tech focused.
- **Wellness / DTC fit.** Low-to-moderate. Dastore is the closest strategic vehicle (early-stage commerce with Carrefour partnership) but its Carrefour lens tilts food/retail, not supplement.
- **Key partners.** Pierre-Eric Leibovici (Managing Partner), Marie Ekeland (ex), Pierre-Yves Meerschman, Willy Braun.
- **Recent portfolio comps.** Back Market, Pasqal, Swile, OWLO, EverDye, Karavela, baCta (Mar 2026), Alpa (Feb 2026 pre-seed $3.5M).
- **Fit score. 4/10.** Strategic shift toward deep-tech/science. Not the right moment.
- **Red flags.** Current thesis drift away from consumer.
- **Preferred pitch language.** French or English.

---

21. Ternel — Paris (ex-MAIF Avenir)

- **URL.** https://www.ternel.vc
- **Pre-seed check (EUR).** €500K–€5M. Pre-seed, Seed, Series A. €120M fund for 30 European startups.
- **Thesis.** Regenerative investments in **Climate, Health, Education**. Supports founders in inclusivity, health, education, biodiversity, climate, circularity.
- **Wellness / DTC fit.** Health is an explicit pillar. Less supplement-commerce specific, more health/wellbeing thesis.
- **Key partners.** Mohamed Abdesslam (Co-lead), Timothée Poulain (Co-lead).
- **Recent portfolio comps.** BlaBlaCar (consumer), Naboo, Edflex (Oct 2025), Cosma (2025), Santé Académie (health training).
- **Intro vector.** MAIF / Capital Croissance LP relationships.
- **Fit score. 6/10.** Health is named thesis; €500K matches their lower-bound. 70% French / 30% rest of continental Europe — Berlin just inside mandate.
- **Red flags.** "Health" framing leans toward services/education over consumer-brand/DTC. Impact framing required in pitch.
- **Preferred pitch language.** French preferred.

---

22. Atlantic Labs — Berlin

- **URL.** https://atlantic.vc
- **Pre-seed check (EUR).** €25K–€5M+; **true pre-seed lead.** "First believer in founders."
- **Thesis.** Pan-European pre-seed. Focus areas: climatetech, **digital health**, future of work, AI & data, mobility, industrial automation, fintech, proptech.
- **Wellness / DTC fit.** Digital health is a named pillar. Clue (period tracker — femtech legacy), Every Health, Circle Health (Feb 2026), Arbio.
- **Key partners.** Christophe Maire (Founder, Managing Partner), Marc Penkala (Partner), Lukas Erbguth (Principal).
- **Recent portfolio comps.** Circle Health (Seed III, Feb 2026 — co-invested with Calm/Storm), Every Health, Arbio, Clue (legacy), SoundCloud, GetYourGuide, Omio, Marley Spoon.
- **Intro vector.** Berlin-local — Timu can meet Christophe through Berlin founder nights, Station F Berlin alumni, or Speedinvest network.
- **Fit score. 9/10.** Berlin-local, pre-seed-native, digital-health-active, and they've co-invested with Calm/Storm (the top-fit fund). Warm parallel pitch with Calm/Storm is a natural double.
- **Red flags.** "Digital health" framing leans clinical/B2B2C. Alche is consumer-first; slight thesis reframe needed.
- **Preferred pitch language.** English or German.

---

23. 360 Capital — Paris / Milan

- **URL.** https://www.360cap.vc
- **Pre-seed check (EUR).** €164K–€11M, sweet spot €2.2M. Invests Pre-Seed to Series B.
- **Thesis.** Deep Tech, Climate Tech, Digital-First solutions. France + Italy primary; broader European.
- **Wellness / DTC fit.** Low — 50 of portfolio are consumer but thesis tilts deeper-tech/industrial. Le Slip Français and 900.care (refillable home) are consumer comps.
- **Key partners.** Fausto Boni (Founding Partner, Milan), Emanuele Levi (ex, now CDP), Lucrezia Lucotti, Giulia Galbiati, Celeste Mastria.
- **Fund size.** €500M AUM. 360 LIFE II climate fund targeting €200M.
- **Recent portfolio comps.** Exotec, Energy Dome, 900.care (consumer DTC), Le Slip Français (DTC apparel), ISAAC (Mar 2026 Milan), Guidoio (driving school).
- **Fit score. 4/10.** Not a wellness fund. Consumer exposure exists but thesis drift is climate/deep-tech.
- **Red flags.** Mandate drift away from consumer DTC.
- **Preferred pitch language.** French, Italian, English.

Also-rans (noted and dismissed — would waste cycles)

- **Nordic Makers (Copenhagen)** — angel collective, $500K–$2M seed, not pre-seed lead. Geography mismatch. **Score 3/10.**

- **InReach Ventures (London)** — $500K–$2M, Seed-focused (not pre-seed), consumer + B2B. Relevant for Seed round, not now. **Score 4/10.**
- **Pale Blue Dot (Malmö)** — pure climate-tech thesis, €500K–€1.5M. Not a wellness fund. **Score 2/10.**
- **OpenOcean (Helsinki)** — B2B enterprise focus, €1M–€5M Seed/Series A. Wrong mandate. **Score 2/10.**
- **Indaco Venture Partners (Milan)** — deep-tech/medtech/biotech. Consumer is non-core. **Score 3/10.**
- **P101 (Milan)** — $1–5M tickets, Seed / Series A. Some wellness exposure (mama health, Deporvillage, Cortilia) but stage above pre-seed. **Score 5/10 — keep for Seed.**
- **"PrimeGreen"** — doesn't exist as a Copenhagen VC. Confused with Frankfurt-based Prime Capital AG (renewable energy infra, not VC). **Dismiss.**
- **"2PM"** — no evidence of such a firm in the European wellness VC space. **Dismiss.**

Top 5 for Alche — Ranked

#1 — Calm/Storm Ventures (Vienna) — Fit 10/10

The single best fit in Europe. Only dedicated wellness/health pre-seed fund with a check size (€50K–€300K) that comfortably co-leads a €500K round. Portfolio signals (Oska, Circle, Foundation Health, Holo, femtech cluster) show they pattern-match on Alche's exact space. Recent Feb 2026 deals prove active deployment. Berlin-friendly (Austria-based, pan-EU). **Lead target for the round.**

#2 — Atlantic Labs (Berlin) — Fit 9/10

Berlin-local pre-seed lead (€25K–€5M range, first-believer mentality) with explicit digital-health thesis and **already co-invested with Calm/Storm on Circle Health in Feb 2026**. Natural parallel pitch. Christophe Maire is accessible via Berlin ecosystem.

#3 — Eutopia (Paris) — Fit 9/10

Best DTC/curated-commerce literacy in Europe. Antoine Fine (ex-Oh My Cream! operator) is uniquely equipped to understand Alche's content-to-commerce engine. Ticket is €500K–€10M — they'd eat the whole round if conviction hits. Portfolio (Oh My Cream!, Feed., Insentials) is the closest thesis-neighbour set anywhere.

#4 — Kima Ventures (Paris) — Fit 9/10

Fast decision, standardized €150K check, fills exactly the gap a pre-seed round needs after a lead lands. Jean de La Rochebrochard decides in ~30 minutes. No follow-on commitment, no drama. Natural completer alongside Calm/Storm or Atlantic Labs as co-lead.

#5 — Otium Capital (Paris, Otium Consumer arm) — Fit 8/10

DTC brand-builder pedigree (Dossier, Adore Me, The Fork). Family-office balance-sheet means patient capital. Natural warm-intro path: via Eutopia (spun out of Otium Brands in 2019) — if Antoine passes, Otium Consumer is the next door. Ticket range absorbs €500K comfortably.

Honorable mentions for Seed (not pre-seed now): Five Seasons Ventures (wellness/supplement-native, but €2M+ tickets), Alven (wellness-brand literate, Seed-first), Icebreaker.vc (healthtech + idea-stage, but Nordic-geo bias).

Wellness-thesis funds specifically aligned with a solo, bootstrapped, EU, retail-first founder like Timu

These three funds are built for exactly Timu's profile — explicit wellness thesis, pre-seed check size, founder-first operating model:

1. **Calm/Storm Ventures.** 50% underrepresented-group portfolio; "often invests very early, before a finalized co-founding team or pitch deck." Solo founders are explicitly welcome. Portfolio includes sole-founder-led taboo-wellness plays. **This is the fund built for Timu.**
2. **Atlantic Labs.** Pre-seed, Berlin-local, "first believer" — Christophe Maire repeatedly backs solo founders at the idea stage. Clue and SoundCloud are solo-founder legacies.
3. **Icebreaker.vc.** Explicitly backs "pre-founders" and idea-stage domain-expert solos. 36% of Fund II is female-founder-led. "Team of partners" model means no single-partner risk. They'd need Berlin-for-Nordics conviction, but their flexibility makes it possible.

Also relevant for solo/bootstrapped ethos: Eutopia (Antoine Fine was a solo founder before investing), Otium Capital (patient family-office capital = no vintage pressure), Shilling Founders Fund (profit-sharing with founders — most founder-aligned economics in EU).

Outreach sequencing recommendation

Week 1 — Warm parallel pitches to Calm/Storm + Atlantic Labs (co-investor pair, highest fit, both Berlin-friendly).

Week 2 — Eutopia + Kima Ventures (Paris doubles: Eutopia to read DTC/curated commerce thesis, Kima for fast-€150K completer).

Week 3 — Otium Capital (via Eutopia intro) + Icebreaker.vc (cold or via Nordic angel network).

Week 4 — Serena (Racine² pillar / Olivier Martret), Ternel (health pillar / Timothée Poulain), Alven (wellness-brand thesis, but position as Seed bridge).

Parking lot (Seed round, 12–18 months out): Five Seasons, Creandum (Peter Specht Berlin), Northzone, Partech Seed team, P101, Kibo.

Portfolio conflicts — red-flag summary

FUND	CONFLICT	SEVERITY
Shilling	**Biocol Labs** (DTC pharmacy/supplements)	High — must clear in first call
Five Seasons	**her1, Spacegoods, ARTAH, Puresport**	Medium — reframe Alche as platform above their brands
Alven	**Feed.** (functional nutrition)	Medium — similar reframe
Eutopia	**Insentials, Feed.**	Low-medium — clarify positioning
Lakestar	**Neko Health** (longevity diagnostics)	Low — adjacent, not competitive
Indico	None identified	—
Calm/Storm	None identified	—
Atlantic Labs	Clue (femtech legacy, non-competitive), Every Health	Low
