Pitch Book **Source**

Twenty-six slides, in markdown. The editable source of truth behind the investor deck.

DOCUMENT
03 of 14 · strategy

PREPARED
April 2026 · Berlin

STATUS
Pre-seed · confidential

Date: 2026-04-24 **Replaces:** pitchbook-final/alche_pitch_book.pdf (Apr 14) + pitchbook-edits.md **Change type:** Full financial rewrite. App stays free. Revenue from curated + own-brand retail + thin membership. Phase 2: own-brand.

SLIDE 1 — Cover

Title: alche

Tagline: Longevity, simplified.

Sub-tagline (new): Editorial commerce for longevity. Built in Berlin, for Europe.

SLIDE 2 — The Problem

Headline: The longevity market is loud, clinical, and expensive.

Body: Europe has a €50B+ supplement market and 66% of Germans taking vitamins — but no editorial curator worth trusting. Consumers bounce between Amazon algorithms, pharmacist defaults, and influencer chaos. The one thing that should be simple — a daily longevity protocol that actually works — is the one thing nobody has solved.

Four frictions: - **Overwhelm** — thousands of SKUs, conflicting claims, no clear starting point - **Trust gap** — 73% of consumers feel overwhelmed buying health products online - **Gatekept pricing** — personalized longevity plans cost €1,000+ through concierge services - **No editorial authority** — Europe has no Goop, no Thrive Market, no Wirecutter-for-wellness

What's missing: A free, intelligent, editorially curated way to get from "I want to live longer and feel better" to "these three products arrive on Thursday."

SLIDE 3 — The Insight

Pull quote: Longevity shouldn't feel like a lab report. It should feel like your smartest friend. And your smartest friend tells you what to buy.

Sub-body: Every longevity app to date has tried to monetize intelligence behind a paywall. We give intelligence away. We monetize the *decision* — the moment of purchase — where the customer already wants to act.

SLIDE 4 — The Solution

Headline: Free intelligence. Curated commerce. Transparent margins.

Subhead: Alche — the European longevity platform

Three pillars:

PILLAR	DESCRIPTION
Free AI protocol	Onboarding generates a personalized daily protocol — supplements, timing, habits — grounded in peer-reviewed research. No paywall.
Curated commerce	AI recommends specific products from Alche's editorially vetted shelf. Every product tied to studies. Every margin disclosed.
Membership flywheel	€5-9/mo membership unlocks discounted pricing, bio-age tracking, and priority access. Small fee, disproportionate commitment (Costco proof).

The bridge: Research → Protocol → Product — one continuous thread. "Here's what your body needs. Here's the science. It arrives Thursday."

SLIDE 5 — How It Works

Headline: Four steps. No friction.

STEP	TITLE	DESCRIPTION
1	Tell us about you	3-minute onboarding — goals, lifestyle, biomarkers if available
2	Get your protocol	AI generates personalized plan — supplements, routines, priorities
3	Shop the shelf	Curated products matched to your protocol. Transparent cost + Alche margin shown.
4	Live it daily	Track, reorder, evolve. Membership layer adds bio-age, advanced insights.

SLIDE 6 — Product Preview

Headline: Product

Visual: App screenshots — protocol view, product shelf, evidence panel, reorder flow.

SLIDE 7 — Key Features

Three-column grid:

FEATURE	DESCRIPTION
AI-personalized protocols	Daily supplement, routine, and lifestyle plans. Tailored to goals, biomarkers, and feedback.
Evidence library	Every recommendation links to peer-reviewed research. Transparent and challengeable.
Curated shelf	30-50 editorially vetted products at launch. Every SKU tied to specific protocols.
Transparent margins	Product cost + Alche markup shown on every page. Trust through disclosure.
Adaptive learning	Protocol evolves with adherence data, feedback, and outcomes.
Digital twin (Premium)	Bio-age score, predictive model, advanced insights. €5-9/mo membership.

SLIDE 8 — Competitive Landscape

Headline: No one in Europe combines science + curation + commerce.

Comparison table:

DIMENSION	ALCHE	SUNDAY NATURAL (DE)	AG1 (US)	THRIVE MARKET (US)	THE ORDINARY	XIAOHONGSHU
Free AI protocol	✅	❌	❌	❌	❌	❌
Editorial curation	✅	Partial	Single SKU	✅	N/A (maker)	✅
Transparent margins	✅	❌	❌	❌	✅	❌

DIMENSION	ALCHE	SUNDAY NATURAL (DE)	AG1 (US)	THRIVE MARKET (US)	THE ORDINARY	XIAOHONGSHU
EU-native	✅	✅	❌	❌	❌	❌
Content→commerce flywheel	✅	Partial	✅	Partial	Partial	✅
Own-brand (Phase 2)	Planned	✅	✅	✅	✅	❌

Positioning line: Alche is "Xiaohongshu for longevity in Europe" — editorial commerce with AI as the curator.

SLIDE 9 — Market Opportunity

Headline: A €7.2B home market, with €50B+ of European tailwind.

Market sizing:

LEVEL	VALUE	DESCRIPTION
TAM — Europe health & wellness (2026)	€380B	Pan-EU wellness, nutrition, fitness, supplements
SAM — European supplements + digital health	€52B	Supplements (€35B) + digital wellness apps (€17B)
SAM — Germany supplements (home market)	€7.2B	9.2% CAGR, 66-70% of population uses VMS
SOM — Year 3 target	€50M GMV	75K active users × €70 AOV × 6 orders/year × 15% capture

The tailwinds: - Germany is #1 functional drinks market in Europe (21.7% share) - Online share of supplements 30-35%, growing 12.6% CAGR - No European brand combines science + curation + commerce at scale

Source: Statista 2024-2026; EU Commission food supplement market report; revenue-model-research.md.

SLIDE 10 — Target Audience

Three persona cards:

PERSONA	PROFILE	SPEND
The Optimizer	28-42, urban, already takes 3+ supplements, tracks sleep/HRV, frustrated by fragmentation	€80-150/mo
The Curious Beginner	26-38, health-conscious but overwhelmed, wants evidence-based starting point	€40-70/mo
The Busy Professional	30-45, high-performer, outsources decisions, wants concierge-quality at consumer pricing	€100-200/mo

Primary geography (Y1-Y2): Germany, Austria, Switzerland, Netherlands, UK. Language launch: EN + DE at Day 1; FR + NL by Month 6.

SLIDE 11 — Go-to-Market Strategy

Three phases:

PHASE	MONTHS	STRATEGY	OUTCOME
Phase 1 — Foundation	0-3	Waitlist growth via editorial content, 15-20 curated SKU launch, Berlin-first community	3K waitlist, 20 SKUs live

PHASE	MONTHS	STRATEGY	OUTCOME
Phase 2 — Acceleration	4-9	Membership tier launch, expand SKU count to 50+, influencer seeding, content library	10K actives, €250K MRR
Phase 3 — Compounding	10-18	Own-brand 2-3 hero products, DACH expansion, B2B wellness pilot	30K actives, €1M MRR

Primary channels: - Long-form content (blog, YouTube essay format) — SEO compounds - Berlin community events — supplement masterclasses with medical advisors - Podcast partnerships with EU longevity voices - Referral program with member-exclusive products

---

SLIDE 12 — Business Model

Headline: App is free. Retail is the business.

Revenue composition (Year 1 → Year 3):

STREAM	YEAR 1	YEAR 2	YEAR 3
Curated third-party product sales	45%	35%	30%
Own-brand product sales	20%	35%	40%
Membership (€5-9/mo, digital twin + perks)	15%	15%	15%
Physical space (events, services — Phase 2)	15%	10%	10%
Premium tier (advanced insights, CGM integration)	5%	5%	5%

Margins:

PRODUCT TYPE	GROSS MARGIN
Curated third-party	25-45% (wholesale markup)
Own-brand supplements (Phase 2)	60-80%
Blended (base case)	**55%**
Membership	90%+

Source: revenue-model-research.md, 100+ comp references, VERIFIED/LIKELY/ESTIMATE flagged per metric.

SLIDE 13 — The Flywheel

Headline: Free content compounds into owned revenue.

Visual flow:

```
Science content (free, open) → builds trust + SEO
  → free app download → genuine wellness value
    → AI recommends products matched to protocol
      → customer purchases curated SKU
        → subscribe-and-save locks reorder
          → data feeds better recommendations
            → content library expands
              → loop compounds (Xiaohongshu pattern)
```

Key proof: Sephora's free app drives 80% of North American sales. AG1 spends $2.2M/mo on free content to sell $600M in products. Content is not marketing — it's the sales engine.

SLIDE 14 — Traction & Milestones

Where we are:

- MVP live on TestFlight (iOS) — AI protocol engine functional
- Protocol personalization tested with 40 beta users
- 20 initial supplier conversations underway (curated shelf candidates)
- Berlin advisory network in formation (MDs, nutritionists, longevity researchers)
- Design system complete and production-ready
- Revenue model validated via 100+ comp research (Apr 2026)

Next 90 days: - Close €500K pre-seed - 10-15 wholesale supplier agreements executed - 3PL onboarded (supplement-specialist, Berlin/Hamburg warehouse) - Public waitlist opened, 3K target - Content engine launches (blog + newsletter)

SLIDE 15 — Roadmap

QUARTER	MILESTONE
Q2 2026	Public waitlist, 20-SKU curated shelf launch, membership tier beta
Q3 2026	App Store public launch (iOS), DE+EN, 10K member target
Q4 2026	Android launch, 50+ SKU catalog, EU-wide shipping
Q1 2027	Own-brand: 2 hero products (Omega-3, Magnesium), Berlin pop-up event series
Q2 2027	Series A prep: €50M GMV run-rate, 30K actives, own-brand at 30% of mix

---

SLIDE 16 — Financial Projections

Headline: Retail economics, base case. Full model in appendix.

24-month projection (base case):

METRIC	Y1	Y2	Y3
Active users (paying)	8K	35K	90K
Orders/year/user (avg)	4.5	6.0	7.5
AOV	€68	€72	€78
GMV	€2.4M	€15.1M	€52.7M
Gross revenue (Alche take)	€780K	€5.8M	€22.2M
Blended gross margin	48%	55%	60%
Gross profit	€375K	€3.2M	€13.3M
OPEX	€750K	€2.4M	€6.0M
EBITDA	**(€375K)**	**€800K**	**€7.3M**

Scenarios:

SCENARIO	Y3 REVENUE	Y3 EBITDA
Conservative	€14M	(€200K)
Base	€22M	€7.3M
Optimistic	€38M	€14M

Key drivers: customer acquisition cost, time-to-first-purchase, reorder rate, own-brand mix % (Phase 2 inflects margin).

SLIDE 17 — Unit Economics

Headline: The math works from Day 1. No 23-month CAC payback.

METRIC	VALUE	CONFIDENCE
CAC (blended)	€35 (target) / €45 (conservative)	ESTIMATE
AOV (curated launch)	€68	LIKELY
AOV (own-brand blended)	€78+	ESTIMATE (Y2+)
Orders per year per customer	4-9 (6 base)	VERIFIED (75-day reorder interval)
90-day reorder rate target	> 40%	Industry benchmark
LTV (base case)	€350	ESTIMATE
LTV (optimistic, own-brand mix)	€550	ESTIMATE
LTV : CAC (base)	**10 : 1**	ESTIMATE
Payback period	< 3 months	Derived
Blended gross margin (Y2)	55%	Modeled
Fulfillment cost / order (DE)	€8	VERIFIED (FLEX Logistik, byrd rate cards)

What's different from v5: We dropped the 12-15x LTV:CAC claim. That was SaaS math applied to a retail business. Real retail LTV:CAC at 10:1 base is strong — Sephora-tier — and defensible.

SLIDE 18 — The Team

ROLE	NAME	BACKGROUND
Founder & CEO	Timu	Product builder, brand strategist, AI-native operator. Built Alche zero-to-MVP solo: product, design, engineering, strategy, research. Berlin-based. Prior: editorial and brand work across EU fashion, wellness, harm reduction. Circassian heritage, queer perspective — builds for underserved wellness markets.

Advisory / planned hires (post-seed): - **Head of Merchandising** — ex-Sephora, ex-Thrive, ex-AG1 style. Curation + supplier relationships. - **Head of Longevity Science** — MD or PhD advisory board chair. Research integrity + content authority. - **Growth Lead** — content-first marketer, SEO + community, DTC wellness background.

SLIDE 19 — Why Now

Five drivers:

- **AI maturity** — LLMs can now synthesize research and personalize at scale. First generation of consumer wellness where intelligence isn't the bottleneck.
- **European white space** — AG1, Ritual, Thrive Market are US-first with minimal EU presence. No European brand combines science + curation + commerce.
- **German trust shift** — 83% of Germans trust their pharmacist (the highest-trusted health source). Alche replicates that trust infrastructure for the digital native.
- **Supplement boom + content collapse** — €50B+ European supplement market. Influencer trust collapsing. Editorial authority is the moat.
- **Post-subscription** — consumers are over SaaS fatigue. Retail + content + optional thin membership is what works (Costco: 92.9% renewal. Amazon Prime: 2.3x spend).

SLIDE 20 — Vision

Headline: The European longevity platform.

Statement: Alche becomes the operating system for European longevity — the single place where science, habit, personal data, and curated products converge.

Sub-vision: From **app** → to **editorial platform** → to **own-brand standard** → to **protocol canon**.

The long game: Alche's protocol becomes the Wirecutter of longevity — the standard European consumers reach for when they want to know what actually works.

SLIDE 21 — The Ask

Headline: Raising €500K pre-seed to go from MVP to revenue-generating retail.

Use of funds:

CATEGORY	ALLOCATION	PURPOSE
Inventory + supplier advances	25% (€125K)	First 20 SKU stock, supplier onboarding, 3PL integration
Engineering	25% (€125K)	iOS polish, Android build, AI engine, commerce layer, membership infra
Growth & content	25% (€125K)	Content engine, waitlist conversion, Berlin community, EU influencer seeding
Team	15% (€75K)	First hire (merchandising lead, contractor-to-FT) + advisory comp
Operations + legal	10% (€50K)	BVL notifications, German entity (GmbH), legal review, accounting

Runway: 18 months to Series A readiness (€50M GMV run-rate, 30K actives, own-brand launched).

Structure: Preferred equity, 15-20% target dilution at pre-seed. Open to SAFE with €3.5M-4.5M cap.

SLIDE 22 — Why Alche

Headline: Xiaohongshu for longevity in Europe.

Four reasons:

- **European white space** — €50B+ market, no editorial-commerce winner. We are.
- **Real revenue from Day 1** — retail model means transactions immediately. No 23-month CAC payback masquerading as "investment."
- **The multiple math** — commerce + membership + AI = 3-5x revenue multiple (vs 1-2x traditional retail). Premium captured by the model.
- **Founder-market fit** — solo-built MVP under real constraints. Berlin-native. Queer-built for underserved wellness. Not a pivot — a conviction.

One line for the deck deck: *"This is the company that eats the 10-year gap between what AG1 proved works and what Europe hasn't built yet."*

SLIDE 23 — In the Wild

Placeholder — filled as traction builds.

- Press mentions
- Beta user testimonials
- Advisor endorsements
- Supplier partner quotes

SLIDE 24 — Contact

Let's talk.

- **Founder:** Timu
- **Email:** [email]
- **Website:** alche.health
- **App:** TestFlight — link on request

Closing line: The future of longevity is editorial, curated, and European. Let's build it.

SLIDE 25 — Appendix

Content: - Full revenue model research synthesis (revenue-model-research.md, 8 sections, 100+ references) - Investor landscape (30-50 EU pre-seed funds, ranked — from agent research) - Supplier due diligence (13 brands, wholesale terms + contacts — from agent research) - Regulatory overview (German supplement law, EU health claims) - 24-month P&L model (base / conservative / optimistic)

SLIDE 26 — Back Cover

alche. Longevity, simplified. Berlin → Europe → the world's first editorial longevity commerce platform.
