ALCHÉ

PREMIUM WELLNESS ECOSYSTEM

DARIA ROTH

The Problem

FRAGMENTATION

Wellness today exists across disconnected elements that do not share data or inform each other:

- Physical places (cafés, studios, spas) no data capture, no customer learning
- Products (supplements, powders) sold without knowing how customers actually use them
- Apps track data but are completely detached from real-world behavior

No competitor combines physical experience + products + digital system + community into one integrated ecosystem.

INFORMATION OVERLOAD & TRUST GAP

Consumers overwhelmed by options, no trusted filter, no curation, no decision support.

They seek curated environments, not just brands

THE GERMAN HEALTH PARADOX

EUR 474 billion spent on health (12.7% of GDP) — OECD

Only 3.1% goes to prevention (~EUR 14.7B) — OECD

7.8 hospital beds/1,000 (OECD avg: 4.3) — a reactive system

62% of Germans say the system focuses too much on treatment — Bertelsmann

Life expectancy 80.8 yrs — below Japan 84.5, Switzerland 83.4 — OECD

There is data everywhere, but no integrated system turning it into actionable information.
Consumers don't need more products, they need a curated, trusted ecosystem that connects experiences, products, and community through one information system.
This is a structural market failure, not a product gap, but an information systems and curation gap.

What is Alché?

One brand, one system

Alché is a high-end wellness ecosystem that integrates a physical space, a proprietary app, a product brand, curated retail and cultural events into one data-enabled business model.

Not a cafe

Not a supplement brand

Not an app

A platform for wellness culture, education, technology

A scalable product brand

An organised combination of people, products and data

THE HYBRID MODEL

As a physical-digital hybrid B2C company, it uses daily rituals, personalized protocols and data-driven feedback loops to generate recurring engagement, while management information systems support coordination, managerial decision-making and scalable growth.

Physical (Berlin)

Flagship location
Functional Smoothies,
LED Red light Therapy, Curated Products, Events
→ Builds trust, generates behavioral data

+

Digital (Global)

Proprietary App
Memberships, Booking,
Personalized Protocols, Online Shop, Community
→ Recurring revenue, borderless scalability

The Alché Ecosystem

Four pillars connected by one information system

Physical Experience

Berlin Mitte flagship
Smoothies + LED red light therapy
In-person wellness events
→ Builds trust, generates
behavioral data,Create emotional connection
encourage routine-based behaviorStrong membership
retention driver

Product Brand & Marketplace

Proprietary outcome-based blends
Curated third-party products
Organized by outcome: Glow,
Energy, Calm, Sleep, Recovery,Anti Inflammatory
→ Revenue + purchase data

Integrated Information System

Events & Culture

Wellness workshops,speakers,sessions
→ Community retention +
engagement data

App & Membership

LED booking + digital menu
Membership (Core/Premium/Unlimited)
Goal-based journeys + Glow Scan
Progress tracking + Digital Twin
→ Recurring revenue + global scale

Each pillar generates data → feeds the core IS → enables evidence-based decisions across the entire ecosystem

ALCHÉ
ALCHÉ

ALCHÉ
POTIONS NO 6

ALCHÉ

The Physical Experience

Where trust, revenue, and data are generated simultaneously

WHAT THE CUSTOMER EXPERIENCES

1. **Book via app** → LED session + smoothie + boost selected before arrival
2. **Arrive** → Smoothie is ready, LED chair is ready
3. **Experience** → LED red light mask on, functional smoothie in hand — 20-minute session
4. **Check-in** → Post-session feedback: energy, mood, skin — feeds the information system
5. **Browse & buy** → Product shelf organized by outcome — or order via app for delivery
6. **Leave & return** → App reminds, recommends, and books the next visit

PRODUCT ECOSYSTEM

Smoothie Bar (6 options, EUR 7–11)

Alché Potions **N°1** *the radience potion,* **N°2** *the focus potion,* **N°3** *the stillness potion,* **N°4** *the repair potion* **N°5** *the balance potion,* **N°6** *the reset potion*

Functional Boosts (+EUR 2 each)

Glow (collagen+vitC) • Energy (lion's mane+maca)
Calm (ashwagandha+reishi) • Gut (sea moss) • Recovery (curcumin)

LED Red Light Therapy

Glow Session (630–660nm) • Recovery Session (810–850nm)
20-minute sessions while drinking smoothie

Product Shelf (outcome-based)

5 own blends (same as boosts, 300g pouches)
Single ingredients (collagen, matcha, spirulina, acai, cacao)
Capsules (omega-3, NAC, CoQ10, NR, probiotics, glutathione)
Curated 3rd-party products (electrolytes, mushroom blends, tools)

Why This Matters

Every smoothie order, every boost selection, every LED session, every product purchase, every event attendance generates structured data that feeds the information system. The physical space is not just a revenue source — it is a data-generating environment that enables the entire ecosystem to learn and improve.

The Alché App

The operating system of the business — not a feature, but the connective tissue

The app does three things: PLANS wellness (goals, protocols, journeys) → EXECUTES them (booking, reminders, routines) → CONVERTS engagement into revenue (membership, sales, subscriptions)

10 MODULES — FULL UI AT LAUNCH, BACKEND DEEPENS OVER TIME

1. LED Booking

Real-time chair availability
20-min slots, session types
Smoothei pre-order at booking

2. Digital Menu

6 smoothies + 5 boosts
Journey-based recommendations
Favorites + reorder

3. Membership

Core / Premium / Credit tracking + auto-deduction
Plan upgrades

4. Shop + Replenishment

All products (own + curated)
Outcome-based browsing
Smart protocol-based reminders

5. Events

Calendar, ticketing, RSVP
Member-only events
Post-event product bundles

6. In-Store Mode

Auto-activates in the space
Credits, recommendations
QR product scanning

7. Goal-Based Journeys

10 goal options (Glow, Energy...)
4-week protocols
Adaptive weekly check-ins

8. Glow Scan

Selfie → Glow Score (0-100)
3 insights + 3 daily tips
Trend analysis over time

9. Progress Tracking

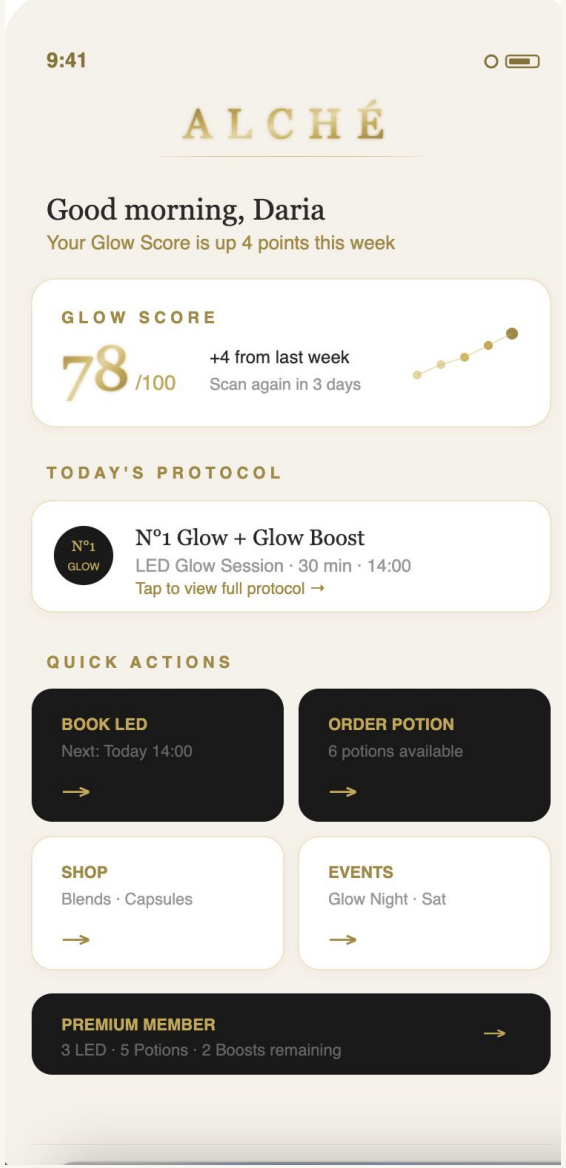
Sleep, stress, energy, skin, gut
Weekly Glow Report
Daily micro-tasks

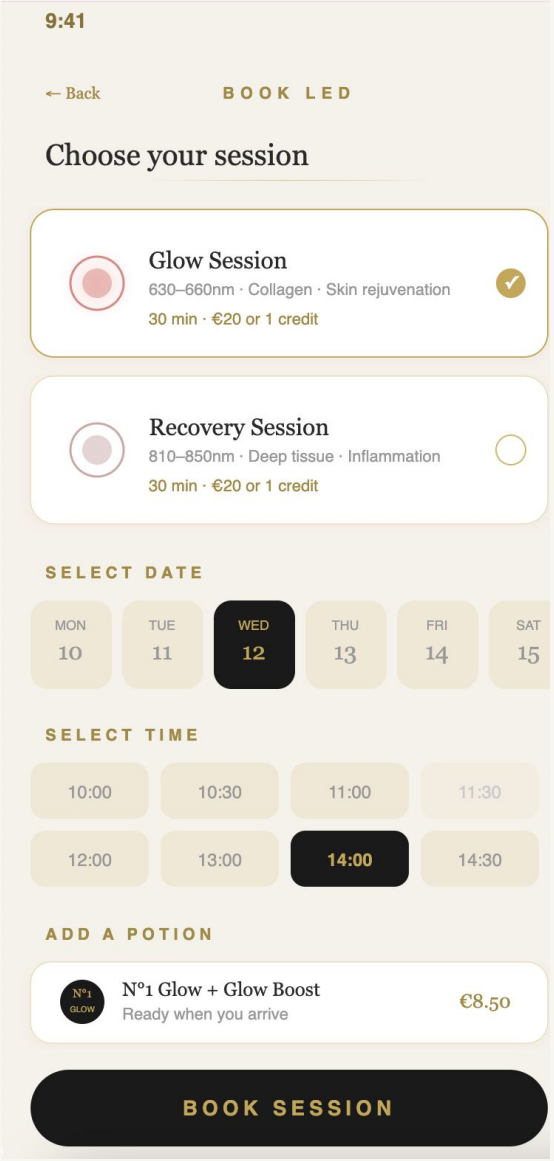
10. Digital Twin

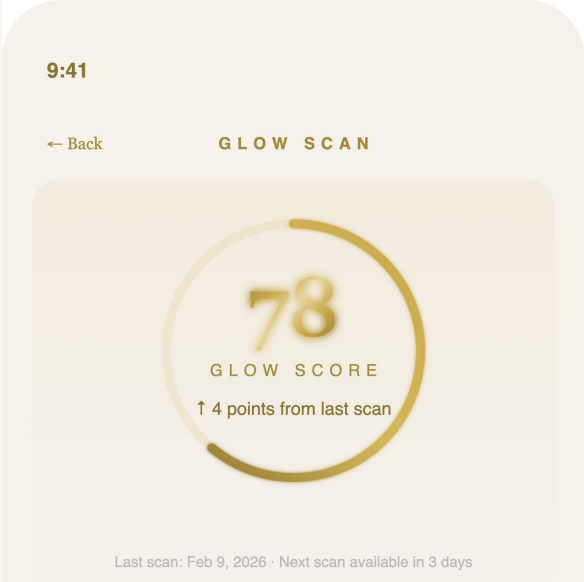
Unified user profile
AI optimization over time
Feeds adaptive journeys

Full UI from day one. Scan, journeys, and Digital Twin start with templates — and get smarter as the system collects data.

The Alché App







The Loop

The entire system is built around a feedback loop that connects physical and digital layers. This is the core contribution: a continuous data-driven feedback loop

1 AI Glow Scan+ Goal Selection

User selects wellness goal in the app

2 Personalised Protocol Created

System generates LED frequency + smoothie + product plan

3 Booking

LED session + smoothie pre-ordered via app

4 Experience

Physical visit: LED mask + smoothie + check-in

5 Data Captured

System records usage patterns (Energy, mood, skin, purchases, attendance → structured data)

6 Insights Generated

System identifies patterns, correlations, and opportunities, progress tracking

7 Recommendations

Product replenishment
Event invitations
Protocol adjustment

8 Re-entry

User returns to loop with smarter protocol → continuous learning

This loop transforms one-time visits into recurring revenue and continuous learning.

Target Market

GERMANY — THE MARKET

Germany spends **EUR 474** billion on health (12.7% of GDP) highest per capita in EU (EUR 5,880) **–OECD 2024**
HEALTH STATISTICS,DESTATIS
3.1% goes to prevention (~EUR 14.7B **– OECD 2024**
Germany = #3 global wellness market at $281 billion **– Global Wellness Institute 2024**

EUR 2.27 billion dietary supplement market **— Statista 2024**

EUR 8.5–9.2 billion DACH functional food market **— Euromonitor 2024**

EUR 10.9 billion digital health market **— Statista 2024**

Germany spends more on health than almost any peer

but achieves below-expected outcomes.

The prevention gap is a market opportunity.

BERLIN MITTE — THE LOCATION

Median age: 37 — peak wellness spending years — Amt für Statistik

28% aged 30–44 — core target demographic

250K+ high-income households (>EUR 4,500 net/mo) — Mikrozensus

90–100K startup employees — EY / Berlin Partner

80–100K English-speaking expats — InterNations

300+ digital health startups — healthcapital.de

Retail rent Torstraße/Rosenthaler: EUR 35–70/m² — JLL

Layered Geographic Strategy

Year 1–2: Berlin Mitte (validate model, collect data) → Year 2–4: Germany / DACH (digital product expansion) → Year 4+: European capitals (system replication)

Customer Segments

Three segments, three entry points — one integrated ecosystem

Urban Wellness Professionals

Age 25–40, metropolitan

18–45 age group drives 41% of total wellness spend — McKinsey 2025

84% rank wellness as #1 priority — McKinsey 2025

2/3 purchased functional nutrition in 2024 — McKinsey 2025

66% own a wearable — Rock Health

Entry: Membership + Products

PKV Insurance Holders

High-income, prevention-oriented

8.73M full PKV + 29M supplementary (min. EUR 69,300/yr) — PKV-Verband

70% of PKV tariffs cover alternative medicine — PKV-Verband

EUR 200–500/yr wellness subsidies in some tariffs — DKV, Allianz

68% of 18–35 willing to pay OOP for preventive health — Deloitte 2023

Entry: Events + Premium Services

Berlin Tech & Expat Community

International, health-conscious

90–100K startup employees — EY / Berlin Partner

80–100K English-speaking expats — InterNations

2,213+ members in Biohackers Berlin meetup — Meetup.com

250K–280K high-income households (>EUR 4,500 net/mo) — Mikrozensus

Entry: Physical Experience Layer

Note: McKinsey data covers the 18–45 age range. Alché targets the core spending segment within this range: ages 25–40.

SHARED CHARACTERISTICS ACROSS ALL SEGMENTS

Value experience over products • Willing to pay premium for quality • Already spend on fragmented wellness • Digital-native, expect app integration • Respond to community and culture

Phased Growth

Phase 1: Validate

Year 1–2 | Berlin Mitte

Launch Berlin Mitte flagship

6 smoothies + 5 boosts + LED therapy

App with all 10 modules (progressive depth)

Build customer base and brand

Collect behavioral data from every interaction

Validate unit economics

IS focus: Core data collection, operational discipline, system calibration

Phase 2: Expand

Year 2–4 | Germany → DACH

Digital marketplace ships across Germany

Products enter DACH market (AT, CH)

Membership base grows digitally

App intelligence deepens (AI, adaptive)

Data informs product expansion

2nd physical location

IS focus: Advanced personalization, smart replenishment, demand forecasting

Phase 3: Replicate

Year 4+ | European Capitals

System replication in new cities

Standardized processes enable scale

Products + app already established

Local flagship + global digital

Corporate B2B wellness partnerships

Marketplace brand portal

IS focus: System replication, multi-location analytics, B2B integration

"Complexity is introduced only when the information system can support it."
Data from Phase 1 informs decisions in Phase 2. Systems from Phase 2 enable replication in Phase 3.
This is system-enabled scalability, not growth through chaos.

Revenue Model

Physical generates trust and data — digital generates scale and recurring revenue

Physical Revenue (Berlin)

Stream	Model	Example
Smoothie + Boost	Per transaction	EUR 7–13 per visit
In-store products	Per transaction	EUR 18–45 per product
Events	Ticketed	EUR 15–30 per event

Digital Revenue (Global)

Stream	Model	Example
Membership	Monthly recurring	EUR 49–149/month
Online product sales	E-commerce	Blends, capsules, ship nationwide
Subscriptions	Monthly auto-delivery	EUR 29–45/month per product
Drops	Limited release	Premium price, hype-driven

WHY THIS REVENUE MODEL WORKS

Diversified: not dependent on a single revenue stream — physical + digital + recurring + transactional

Recurring: memberships and subscriptions stabilize cash flow and enable financial planning

Scalable: digital revenue (online shop, memberships, subscriptions) grows without adding physical space

Data-connected: the IS links all revenue streams — cross-sell optimization, replenishment triggers, upsell logic

Infrastructure & Digital Payments

Cloud-first, secure, designed for scale

CLOUD-BASED INFRASTRUCTURE

Cloud ERP: operations management — inventory, orders, logistics

Cloud CRM: customer data, lifecycle tracking, segmentation

Analytics platform: business intelligence, dashboards, reporting

Booking system: LED sessions, events, capacity management

Why cloud? Scalable, flexible, cost-effective.
Start small in Berlin, scale to DACH and Europe
without massive upfront infrastructure investment.

UNIFIED PAYMENT SYSTEM

Omnichannel: one payment platform for in-store + app + website

Methods: card, Apple Pay, Google Pay, SEPA, PayPal

Subscriptions: automated recurring billing for memberships

Security: PCI DSS compliance, tokenization, GDPR-compliant

Reference: Adyen model — unified payment platform
for hybrid businesses. One system processes all
transactions regardless of channel.

GERMANY'S DIGITAL HEALTH INFRASTRUCTURE ADVANTAGE

DiGA system: world-first regulated digital health app pathway — Germany leads in digital health regulation

ePA: 73 million Germans covered by electronic patient record — digital health is mainstream

EUR 10.9 billion digital health market (Statista) — infrastructure and demand are both present

300+ digital health startups in Berlin (healthcapital.de) — ecosystem and talent are available

GDPR compliance = competitive advantage: in health data, trust is everything — EU regulation builds trust rather than limiting it

Competitive Advantage & SWOT

Integration is the moat — competitors can copy parts, not the system

COMPETITIVE LANDSCAPE — BERLIN

Competitor	What They Do	What's Missing
YEARS	Diagnostics & longevity (EUR 3,000+)	No daily rituals, no products, no community
Vabali Spa	Spa experience (EUR 35–47/visit)	No digital layer, no personalization, no data
Daluma / Joe & Juice	Smoothies & food (EUR 6–10)	No LED, no integrated IS
Recover Society	Recovery tech (cryo, LED)	No nutrition, no membership loop, no app

Alché = all of the above, connected by one IS. That integration cannot be easily copied.

SWOT ANALYSIS

Strengths

- Integrated MIS
- Hybrid model
- Multiple Revenue Streams
- Pre Launch Community Building
- The Loop
- Phased Growth Model
- Data-driven decisions
- Unique ecosystem
- Outcome-based products

Weaknesses

- High initial setup cost
- Single location at start
- Regulatory Complexity
- No track record of concept yet
- Depends on tech adoption
- Early stage brand
- AI Features require significant data volume

Opportunities

- $281B German market
- EUR 1.2–1.5B DACH VC
- Prevention gap (3.1% of EUR 474B)
- Scalable hybrid model(digital expansion beyond Germany)
- Corporate B2B wellness(tax benefit+ selling bulk membership to companies)

Threats

- Established wellness brands
- GDPR / data regulation
- Economic downturn
- Competitor entry in Berlin
- High Berlin rent cost
